Administrator_ Teri Watson,

I am writing to urge you to support SB 606 which will include employees of the Stabilization and Crisis Unit (SACU) and the Oregon State Hospital (OSH) who have direct contact with patients to the current Post Traumatic Stress Injury presumption.

The acuity levels of individuals under our care have exponentially risen and as a consequence, workers like myself are getting injured at high levels. Including us into this presumption streamlines our access to mental health benefits and ensures we have the same access as our counterparts working at the other 24/7 facility run by the state.

The proposed bill does not change the qualifications under current statute, rather, it only adds SACU and OSH workers to the list of “covered” employees.

Workers like me, who have dedicated their life to serving Oregon’s most vulnerable populations, deserve to be treated fairly. It’s not surprising that if/when we develop PTSI, it’s because of trauma at work. .

Please support state workers and vote YES to include us in the PTSI presumption.

In solidarity,

Kristen Brown
