Average number of years that providers have been licensed

Oregon DHS contracted Portland State University's Institute on Aging to conduct a survey of a statewide sample of adult foster homes in 2016. Results are based on provider responses to a questionnaire that was mailed in January 2016. Some questions asked for current information while others asked about events that occurred during the prior 90 days. As responses were received through March of 2017, the time period for responses varies from October 2016 through March 2017. A total of 340 adult foster homes with 1,259 residents responded for a 52% response rate. The full report is available at: <https://www.pdx.edu/iao/oregon-community-based-care-project> & <http://www.oregon.gov/DHS/SENIORS-DISABILITIES/Pages/publications.aspx>, June 2017.
