

Step 4: Click Apply

- Log out of your computer and then log back in
- Open OTTER
 - If still is not working, close OTTER and go back to **Control Panel>Display>Adjust resolution**

*If you have gone through all steps and you are still unable to view OTTER, then the issue is not with OTTER, but your Operating System. You will need to contact Windows Support by following this link: <https://support.microsoft.com/en-us>.
