**LCB VEHICLE STICKER ANNOUNCEMENT**

This Announcement is to inform you that effective January 1, 2016, the vehicle stickers previously issued by the LCB will no longer be accepted as the 4 digit number required in any and all advertising on vehicles and trailers.

The LCB rules require all written advertising to include the 4 digit landscape contracting business license number. In the past, the LCB provided stickers for vehicles which included that 4 digit number. The LCB has not provided these stickers for several years.

If you advertise your business on your vehicle, you must include your 4 digit number within the advertisement itself. If you relied on your vehicle sticker to meet this requirement and you do not have this number with the signage, you will need to update your signage to include that 4 digit number.

Please note, you are not required to advertise on your vehicle or even have your 4 digit LCB number on your vehicle. This is a requirement only if you advertise your business on a vehicle or trailer (and all other written advertising).
