

OHP Mobility Standards TAC 2011

Due to the varied work required to implement the Joint Subcommittee's OHP-related recommendations and the aggressive schedule for these tasks, initial work products will be developed by staff in consultation with an internal ODOT Technical Advisory Committee. Guidance document and procedural changes will be worked with applicable Agency technical leadership and implemented as soon as possible.

Staff will consult with a number of other groups on potential policy amendments and considerations to ensure a broad representation of external perspective prior to OTC action. These groups include:

- Rules Advisory Committee appointed by LCDC considering amendments to the TPR,
- Applicable OTC-appointed advisory committees, and
- Area Commissions on Transportation and other regional groups.

The Technical Advisory Committee is made up of a cross section of ODOT planning and technical staff directly involved with OHP mobility standard applications.

TAC Members

- Kent Belleque, Engineering Services
- Steve Lindland, Engineering Services
- Michael Bufalino, Freight Mobility
- Brian Dunn, Planning Analysis
- Doug Norval, Planning Analysis
- Lidwien Rahman, Region 1
- Terry Cole, Region 2
- Lisa Cortes, Region 3
- Jim Bryant, Region 4
- Teresa Penninger, Region 5
