LUBA No. 84-072  
FINAL OPINION  
AND ORDER

Appeal from Linn County.

Stephen C. Hendricks, Portland, and Robert Liberty, Portland, filed the Petition for Review and argued the cause on behalf of petitioner.

Corinne C. Sherton, Salem, filed a response brief and argued the cause on behalf of Respondent Mountain Rivers Estates, Inc. With her on the brief were Sullivan, Josselson, Johnson & Kloos.

No appearance by Respondent County.

KRESSEL, Referee; BAGG, Chief Referee; DUBAY, Referee participated in the decision.

REVERSED IN PART, REMANDED IN PART 12/20/84

You are entitled to judicial review of this Order. Judicial review is governed by the provisions of ORS 197.850.

LUBA No. 84-072  
FINAL OPINION  
AND ORDER

12 Appeal from Linn County.

13 Stephen C. Hendricks, Portland, filed the Petition for  
Review and argued the cause on behalf of petitioner.

14 Lynn Rosik, Albany, filed a response brief and argued the  
15 cause on behalf of Respondent County.

16 Corinne C. Sherton, Salem, filed a response brief and  
argued the cause on behalf of Respondent Mountain Rivers  
17 Estates, Inc. With her on the brief were Sullivan, Josselson,  
Johnson & Kloos.

18 REVERSED IN PART, REMANDED IN PART           12/20/84

19 You are entitled to judicial review of this Order.  
20 Judicial review is governed by the provisions of ORS 197.850.

1 Opinion by Kressel.

2 NATURE OF THE DECISION

3 Petitioner appeals the county's determination that  
4 Intervenor Mountain Rivers Estates, Inc. (MRE) has a vested  
5 right to complete a planned unit development.

6 FACTS

7 Early in 1979, MRE initiated the application process for  
8 approval of the PUD in question. Final approval of the 111  
9 unit project,<sup>1</sup> which included exceptions to Statewide  
10 Planning Goals 3 and 4, was granted three years later.  
11 However, an appeal to this Board resulted in a remand of the  
12 county's decision on grounds the resource goal exceptions were  
13 inadequate. Mason v. Linn County, \_\_\_ Or LUBA \_\_\_, LUBA No.  
14 83-036 (1983).

15 After the remand, MRE renewed its request for final PUD  
16 approval. In addition MRE filed an alternative request for a  
17 determination that, notwithstanding the governing land use  
18 restrictions, it had acquired a vested right to complete the  
19 project by virtue of prior, lawful expenditures.

20 The county addressed the PUD and vested right requests in  
21 separate proceedings. In May, 1984, plan and zone changes  
22 associated with the PUD were again approved. Hearings on the  
23 vested rights claim were held in April, May and June, 1984.  
24 Petitioner, whose agricultural land is separated from the site  
25 in question by a road, opposed the claim at the hearings. In  
26 August, 1984, Order No. 84-470 was adopted, upholding MRE's

1 vested rights claim. This appeal concerns the validity of  
2 Order No. 84-470.<sup>2</sup>

3 FIRST ASSIGNMENT OF ERROR

4 Petitioner first contends the county failed to follow  
5 appropriate procedures in considering the vested rights claim.  
6 The contention has two elements: (1) The county undertook  
7 consideration of the claim without the benefit of written  
8 procedural rules, in violation of ORS 215.412 and (2) the  
9 procedures which were followed were inadequate because they did  
10 not provide certain protections normally allowed in civil  
11 litigation, e.g., prehearing discovery of documentary evidence,  
12 depositions and cross-examination of adverse witnesses.

13 ORS 215.412 requires the governing body to adopt, by order  
14 or ordinance, "one or more procedures for the conduct of  
15 hearings." Evidently, no written procedures were in place  
16 before respondent commenced the hearings in question.<sup>3</sup> The  
17 record does indicate that agreement was reached on a hearing  
18 schedule, and a deadline for submission of written evidence.

19 Petitioner does not explain why the county's failure to  
20 adopt a procedural order or ordinance under ORS 215.412  
21 warrants remand or reversal of the challenged decision. See  
22 ORS 197.840(8)(a)(B). As we have noted on previous occasions,  
23 one who complains of procedural error at the local level must  
24 not only demonstrate the existence of error but must also show  
25 (1) that a timely objection was made so that corrective  
26 measures might be taken and (2) the error was prejudicial to

1 petitioner's substantial rights. Meyer v. Portland, 7 Or LUBA  
2 184, 190 (1983); Frey Development Company v. Marion County, 3  
3 Or LUBA 45, 50 (1981). Here, neither prerequisite has been  
4 satisfied. Petitioner, who was represented by counsel at the  
5 county's hearings, has not shown an objection was made to the  
6 absence of written procedural rules at any stage of the  
7 proceeding. See South of Sunnyside Neighborhood League v.  
8 Board of County Commissioners of Clackamas County, 280 Or 3,  
9 10, 569 P2d 1063 (1977). Nor has petitioner demonstrated his  
10 interests were prejudiced by the county's ad hoc formulation of  
11 procedures.<sup>4</sup> Accordingly, we must reject the first element  
12 of the procedural challenge.

13 Petitioner's second procedural challenge is that the county  
14 erred in failing to provide for prehearing discovery (i.e.,  
15 production of documents relevant to the vested rights assertion  
16 and oral depositions) and for cross-examination of  
17 representatives of MRE during one of the public hearings held  
18 by the county. However, we decline to consider the claims  
19 regarding prehearing procedure because petitioner did not  
20 assert the alleged rights at the county level. As a result,  
21 the claims were waived. South of Sunnyside Neighborhood League  
22 v. Board of County Commissioners of Clackamas Co., supra, 280  
23 Or at 10. Meyer v. Portland, supra.

24 The argument that cross-examination of MRE's  
25 representatives should have been allowed during the county's  
26 final evidentiary hearing stands on different footing. The

1 parties agree petitioner's counsel requested permission to  
2 cross-examine at least one representative of MRE and that the  
3 request was denied.<sup>5</sup> Further, petitioner convincingly  
4 maintains his ability to demonstrate the inadequacy of MRE's  
5 proof of the vested rights claim was prejudiced by the county's  
6 refusal to allow cross-examination. Under these circumstances,  
7 we consider the issue properly before us for decision.

8 As already noted, the legislatively-mandated procedures for  
9 county land use hearings are general in nature. Specific  
10 procedural requirements for the conduct of hearings are not set  
11 forth in the governing statutes or the county ordinance. If  
12 petitioner's claim is to be sustained, therefore, it must be  
13 grounded on constitutionally guaranteed procedural rights.  
14 Anderson v. Peden, 284 Or 313, 315, 587 P2d 59 (1978). See  
15 also West v. City of Astoria, 18 Or App 212, 228-29, 524 P2d  
16 1216 (1974) (Schwab, C.J., concurring) (procedures for land use  
17 hearings set forth in Fasano v. Washington County Commission,  
18 264 Or 574, 507 P2d 23 (1973) are evidently required by the due  
19 process provisions of the state and federal constitutions).

20 Petitioner's argument in support of his cross-examination  
21 request is difficult to follow. As we read the petition, the  
22 argument is that denial of the "right" of cross-examination  
23 constituted denial of another "right" - the right to offer  
24 evidence and argument in rebuttal of the applicant's position.  
25 See petition at 16.

26 /////

1 The latter right has been recognized in previous cases  
2 involving quasi-judicial land use proceedings. See, e.g.,  
3 Fasano v. Washington County Commission, supra; Lower Lake  
4 Subcommittee v. Klamath County, 3 Or LUBA 55 (1981).

5 We have considerable difficulty in understanding how denial  
6 of cross-examination can be translated into denial of  
7 petitioner's recognized right to offer rebuttal evidence. The  
8 two procedural tools are logically distinct. See South of  
9 Sunnyside Neighborhood League v. Board of Commissioners of  
10 Clackamas County, 27 Or App 647, 663-664, 557 P2d 1375 (1976);  
11 reversed 280 Or 3, 569 P2d 1063 (1977).

12 We will not attempt to look further into the nature of  
13 petitioner's undeveloped argument.

14 Petitioner may intend to claim that the asserted right to  
15 cross-examine MRE's witnesses has constitutional support  
16 independent of the amorphous connection to the right of  
17 rebuttal. See generally, Note, Specifying the Procedures  
18 Required by Due Process, 88 Harv L. Rev 1510 (1975). If this  
19 is so, however, we find no discussion in the petition of the  
20 constitutional law theory supporting the claim. We will not  
21 speculate on the merits of this undeveloped theory.<sup>6</sup> See  
22 Megdal v. Board of Dental Examiners, 288 Or 293, 296-297, 605  
23 P2d 273 (1980); Pierron v. Eugene, 8 Or LUBA 113, 118 (1983).

24 Petitioner's first assignment of error is denied.  
25  
26

1 SECOND ASSIGNMENT OF ERROR

2 Petitioner divides the second assignment of error into  
3 eight subassignments. Each takes issue with an aspect of the  
4 county's decision in relation to the legal tests for vested  
5 rights noted in Polk County v. Martin, 292 Or 69, 81, footnote  
6 7, 636 P2d 952 (1981).<sup>7</sup> Before taking up these claims,  
7 however, we find it helpful to review the complex factual  
8 context in which the county's decision arises. We base this  
9 summary principally on the extensive findings of fact set forth  
10 in the final order. Other pertinent facts in the record are  
11 also mentioned.

12 1. Summary of Findings of Fact

13 The property in question (Hale Butte) consists of 252.58  
14 acres, all but 50 of which were acquired in 1966<sup>8</sup> by Marion  
15 Towery, now vice president of MRE. Hale Butte was unzoned when  
16 it was acquired by Mr. Towery. Between 1966 and 1971, when  
17 zoning was first applied to the property, the following  
18 activities took place:

- 19 (1) 118 acres on top of the butte was cleared and  
20 fire break roads were constructed in preparation  
for surveying the property for later development.
- 21 (2) A surveyor was hired to design a road leading  
22 from Mason Road, at the southwest corner of the  
property, to the butte.
- 23 (3) A well was drilled to serve as a source of water  
for later development.
- 24 (4) 4,000 lineal feet of Mason Road were improved and  
25 the new road referred to in (2) was excavated,  
26 compacted and graded to county standards for  
residential use.<sup>9</sup>

1 (5) Other land was graded to facilitate drainage of  
2 the property.

3 (6) The entire site was topographically mapped.

4 (7) A consultant was hired to plan a sewage disposal  
5 system for a large scale residential development.

6 In 1971 the property was zoned F-2, Rural Acreage. This  
7 zone permitted residential use outright and imposed a five acre  
8 minimum lot size. In January, 1972, the county approved a  
9 rezoning and a 15 unit subdivision request on 10 acres of  
10 bottomland on the MRE site abutting Mason Road. The rezoning  
11 designated the 10 acres as F-3, Rural Residential, authorizing  
12 one acre lots (one half acre with public water supply).  
13 However, the approved plat was never developed. It was  
14 subsequently abandoned in favor of other uses for the property  
15 in connection with MRE's larger PUD proposal.

16 In March, 1972 the county adopted a comprehensive plan,  
17 designating the entire site Rural Residential. A new zoning  
18 map classified most of the site<sup>10</sup> as ART-5, Agricultural,  
19 Residential and Timber use. The zone authorized two single  
20 family dwellings on a lot five acres or larger. The total  
21 allowable number of units on the unsubdivided portion of Hale  
22 Butte thus doubled in relation to the prior zoning.<sup>11</sup>

23 Between 1971 and 1973 MRE made further expenditures for the  
24 water system to serve residential development of the site.  
25 Five additional wells were drilled, a pump, mains and pipelines  
26 were installed and a well pumphouse was built.

1 In December, 1972, the state Health Division issued  
2 provisional approval for a water system to serve the 15 lot  
3 subdivision along Mason Road, as the first of phased  
4 development of the site.<sup>12</sup>

5 Between September, 1975 and July, 1977, MRE installed a  
6 100,000 gallon water storage tank and made other improvements  
7 associated with its planned water system.

8 In July, 1978, the entire site was rezoned at MRE's request  
9 from ART-5/SR to ART-2 1/2, thereby increasing the allowable  
10 density. The rezoning order acknowledged the landowner's plans  
11 for a residential PUD but noted "the indicated PUD must be  
12 approved prior to any development." Record at 428.

13 In February, 1980, MRE submitted a request for Stage 1  
14 approval of a 111 unit PUD at Hale Butte. The request was  
15 administratively processed under the county's 1972 zoning  
16 ordinance and approved early in 1980.

17 Stage 2 approval was granted by the county governing body  
18 in June, 1980.<sup>13</sup> The Stage 2 approval included exceptions  
19 from Statewide Planning Goals 3 (agricultural) and 4 (forest  
20 land). Also approved was a preliminary subdivision plat for  
21 the property. MRE expended slightly less than \$17,000 on  
22 professional services for preparation of the Stage 2  
23 application and PUD plan.

24 In August, 1980 the county adopted a new comprehensive  
25 plan, zoning ordinance and land division ordinance. The plan  
26 designated the site Rural Residential and adopted exceptions

1 from Statewide Planning Goals 3 (agricultural land) and 4  
2 (forest land). The new zoning ordinance did not significantly  
3 alter the prior zoning regulations affecting the property.

4 In 1981, after approval of the final street plans by the  
5 county engineer, primary and secondary roads for the PUD were  
6 graded and graveled at a substantial expense.

7 In December, 1981, MRE was advised by county planning  
8 officials that the goal exceptions for Hale Butte would be  
9 reviewed by LCDC in a February, 1982 acknowledgement  
10 proceeding. The letter warned that "scrutiny" of the  
11 exceptions by LCDC was likely, adding "you may wish to consider  
12 this issue in the final development of Mountain River Estates  
13 Planned Unit Development." Record at 487. On February 17,  
14 1982, LCDC adopted a continuance order indicating the county's  
15 Goal 3 and 4 exceptions for the MRE site were inadequate.  
16 Notwithstanding this action, MRE's Stage 3 PUD application was  
17 approved by the county planning commission in September, 1982.  
18 The approval was appealed to the governing body by Petitioner  
19 Mason.

20 On August 5, 1982, the state Health Division indicated  
21 MRE's plan for expanding and improving its water system  
22 generally complied with the Division's rules. Two months later  
23 the state Department of Environmental Quality issued a Water  
24 Pollution Control Facilities permit for MRE's sewage disposal  
25 system. The county governing body issued Stage 3 approval of  
26 the PUD on December 13, 1982. However, the effect of the order

1 was stayed pending determination on the Goal 3 and 4 issues.  
2 The board further stated that no additional work was to be done  
3 on the PUD until the goal issues were resolved.

4 In March, 1983, the board adopted exceptions to Goals 3 and  
5 4 for the MRE site. However, development of the PUD was again  
6 delayed until any appeals of the Board's decision were finally  
7 determined.

8 Petitioner Mason appealed the county's Stage 3 approval of  
9 the PUD to the Land Use Board of Appeals (LUBA). Subsequently,  
10 LUBA remanded the decision to the county on grounds the  
11 resource goal exceptions had not been adequately justified.

## 12 2. Final Order

13 The final order concludes MRE has a vested right to  
14 complete "development of a 111 residential planned unit  
15 development, previously approved as Case No. S-10-79/80..."  
16 despite the restrictions imposed by Statewide Planning Goals 3  
17 and 4. Record at 1.

18 The final order calculates the total cost of the project as  
19 \$1,797,980. The total evidently does not include the cost of  
20 constructing homes in the 111 unit PUD. MRE's expenditures as  
21 of four different dates are set forth in the order as follows:

22 July 20, 1971 (first zoning of site - allowing maximum of  
60 units on site (1 unit per 5 acre lot)) - \$121,164

23 January 1, 1975 (adoption of statewide goals) - \$171,352

24 February 7, 1982 (issuance of LCDC Continuance Order  
25 rejecting Goal 3 and 4 exceptions for the site) - \$547,107

26 September 30, 1982 (filing of appeal of Planning

1 Commission Stage 3 approval by Mason - \$620,206

2 The order concludes that regardless of which date is  
3 used,<sup>14</sup> the expenditures made by the landowner in developing  
4 the PUD qualify for protection under the vested rights doctrine  
5 set forth in Clackamas County v. Holmes, supra.

6 The most recent outline of the factors<sup>15</sup> required to be  
7 considered under the doctrine appears in Polk County v. Martin,  
8 supra and related cases. The factors can be summarized as  
9 follows:

10 "(1) The good faith of the property owner in making  
11 expenditures to lawfully develop his property in  
a given number; (Original emphasis.)

12 "(2) The amount of notice of any proposed rezoning;

13 "(3) The amount of reliance on the prior zoning  
14 classification in purchasing the property and  
making expenditures to develop the property;

15 "(4) The extent to which the expenditures relate more  
16 to the nonconforming use than to the conforming  
uses;

17 "(5) The extent of the nonconformity of the proposed  
18 use as compared to the uses allowed in the  
subsequent zoning ordinances;

19 "(6) Whether the expenditures made prior to the  
20 subsequent zoning regulation show that the  
property owner has gone beyond mere contemplated  
21 use and has committed the property to an actual  
use which would in fact have been made but for  
22 the passage of the new zoning regulation;

23 "(7) The ratio of the prior expenditures to total cost  
of the proposed use."

24 We take up petitioner's arguments in connection with these  
25 factors below.

26

1     Arguments 1 and 2

2     In his first two arguments, petitioner questions the  
3 county's conclusion that MRE acted lawfully and in good faith  
4 in incurring the expenditures relied on to support the vested  
5 rights claim. If the expenditures were incurred without  
6 required approvals or in an effort to "outrace" pending changes  
7 in the law, they would not weigh in favor of the vested rights  
8 claim. Clackamas County v. Holmes, supra; Polk County v.  
9 Martin, supra; Morrel v. Lane County, 46 Or App 485, 612 P2d  
10 304 (1980).

11     Petitioner's first argument can be broken down as follows:  
12 (1) the applicable ordinances prohibited development of the  
13 Hale Butte PUD Unit 1, until Stage 3 (final) approval was  
14 granted; (2) by the time the county granted Stage 3 approval  
15 the developer had already made the improvements later relied on  
16 to support the vested rights claim; (3) before Stage 3 approval  
17 was granted, the county and MRE were on notice the project  
18 conflicted with the statewide goals. Based on these points,  
19 petitioner claims the expenditures by MRE should not have been  
20 considered lawful and in good faith.

21     Petitioner's argument relies heavily on Section 28.080 of  
22 the Linn County Zoning Ordinance, adopted in 1972. That  
23 section provides:

24     "Building permits for a Planned Unit Development shall  
25     be issued only after final approval by the Planning  
26     Commission has become effective in accordance with  
27     Section 18.080 and the Linn County Buiding [sic]  
28     Official finds that such permits conform to the

1 approved Planning Unit Development plans approved by  
the Planning Commission."

2 A similar provision appears in the county zoning ordinance of  
3 1980 (See Section 26.145(1) 1980 Zoning Ordinance of Linn  
4 County).<sup>16</sup>

5 Petitioner takes the position these provisions render  
6 unlawful expenditures by MRE between 1967 and 1982 for roads,  
7 water and sewage systems at Hale Butte because Stage 3 approval  
8 of the PUD was not granted until 1983. He reminds us the  
9 county itself interpreted the ordinance along these lines at  
10 various times after 1978, when the property was rezoned to  
11 facilitate eventual large scale development.<sup>17</sup> Indeed, the  
12 county expressly noted, in its order of March 18, 1983  
13 approving the Stage 3 plan, that improvements made by MRE prior  
14 to that date were in contravention of the governing zoning  
15 ordinance. The order stated:

16 "CONCLUSIONS:

17 "1. Substantial amounts of public facilities have  
18 been installed within the Mountain River Estates  
19 PUD. Specifically, the main infrastructure e.g.  
20 well, reservoir, and transmission piping for the  
21 community water system, have been installed.  
These were completed prior to submission of the  
PUD request in 1978, and were constructed with  
the eventual desire to obtain County approval of  
a planned unit development.

22 "2. The balance of the improvements have been  
23 constructed during the period prior to final plat  
24 approval. Provisions of Article 28, Sections  
25 28.110 and 18.090 provide clear direction that no  
26 building permits or public facilities  
construction may take place prior to final  
approval under Stage III of the PUD procedures.  
Although provisions of the Land Division

1 authorize development between the preliminary and  
2 final plat approvals, the nature of the planned unit  
3 development process is intended to allow conceptual  
4 approval of a plan under Stage II prior to requiring  
5 the developer to develop final working plans for  
6 ultimate development under Stage III."

7 Petitioner's reading of this portion of the zoning  
8 ordinance is at odds with the interpretation made in the final  
9 order at issue here. The order notes that the PUD ordinance  
10 bars only issuance of building permits prior to Stage 3 PUD  
11 approval, and that there are no provisions in the ordinance  
12 governing when construction of public facilities and other  
13 improvements may take place. In the county's view, that issue  
14 is resolved by reading the PUD ordinance in conjunction with  
15 the county's subdivision ordinances. Under the PUD ordinances,  
16 when a PUD also involves the subdivision of land, the review of  
17 the project is to incorporate the applicable provisions of the  
18 land division ordinance. See Section 28.010 (1972 ordinance)  
19 and 26.020 (1980 ordinance). According to the county, the land  
20 division ordinances permit street improvements to be made after  
21 preliminary subdivision plat approval and before final plat  
22 approval. The relationship between the three stages of PUD  
23 approval under the zoning ordinance and the two stages of  
24 subdivision plat approval under the land division ordinance are  
25 described as follows in the final order:

26 "Both the 1972 and 1980 PUD ordinances and the 1978  
and 1980 subdivision ordinances require that the final  
plan/plat be consistent with the preliminary plan/plat  
and any conditions imposed. Therefore, we conclude  
that the most logical way to integrate these two  
ordinances is to interpret PUD Stage Two approval to

1 be equivalent to preliminary plat approval and to  
2 interpret them to allow street construction prior to  
3 final plan/plat approval, if carried [sic] out pursuant  
4 to a final street plan which is consistent with the  
5 preliminary plan/plat and has been approved by the  
6 County Engineer. This is what was done by MRE in this  
7 case, and therefore its 1981 expenditures on road  
8 construction were for work legally done. The above  
9 interpretation of these ordinance provisions  
10 supersedes that made by us in Order No. 83-097,  
11 adopted March 18, 1983." Record at 36.

12 The task of determining the correct interpretation of the  
13 ordinance is complicated by the county's contradictory  
14 interpretations in the context of the same project. We note  
15 also that the above-quoted interpretation refers only to the  
16 validity of the street construction work done by MRE, and not  
17 to any other improvements considered in the vested rights  
18 determination. It does not explain, for example, why MRE's  
19 installation of its water system at Hale Butte prior to Stage 2  
20 approval of the PUD conformed to the PUD ordinance.

21 We will uphold a local government's reasonable  
22 interpretation of a local enactment. Fifth Avenue Corp. v.  
23 Washington County, 282 Or 591, 581 Pld 50 (1978). However, we  
24 are not bound to accept an interpretation simply because it is  
25 advanced to us as correct by the local tribunal.

26 We are unable to accept the county's most recent reading of  
the PUD and land division ordinances on this question. We are  
cited to no provision in either document which overrides the  
explicit prohibition on issuance of building permits prior to  
Stage 3 (final) PUD approval under the zoning ordinance. That  
ordinance, taken as a whole, makes it clear that until Stage 3

1 review is reached, a proposed PUD is largely conceptual in  
2 nature.<sup>18</sup> The ordinance indicates that street plans and  
3 other proposed uses are finally approved at the Stage 3, not  
4 the Stage 2 phase. The entire PUD proposal may be denied at  
5 Stage 3 for nonconformance to the governing criteria. See  
6 Section 26.135, Linn County Zoning Ordinance. Indeed, until  
7 the vested rights determination was made, this was the county's  
8 own view of the appeal process with respect to the Hale Butte  
9 project, as portions of the record indicate.<sup>19</sup>

10 We agree with petitioner that it would be illogical to  
11 permit a PUD developer to establish a pattern of roads and  
12 other significant support facilities before the approval  
13 authority reviewed and finally approved the specific design of  
14 a planned unit development. See, generally, Frankland v. City  
15 of Lake Oswego, 267 Or 452, 465, 517 P2d 1042 (1973). That  
16 approach would virtually make Stage 3 approval of the plan a  
17 fait accompli instead of a procedure for complete review of the  
18 final project, as the text of the ordinance strongly suggests.

19 We conclude the county zoning ordinance did not authorize  
20 MRE to make the improvements detailed in the challenged final  
21 order until Stage 3 approval of the PUD was obtained. This  
22 aspect of the petition is therefore sustained and requires  
23 reversal of the order. Clackamas County v. Holmes, supra;  
24 Morrel v. Lane County, supra.

25 The foregoing discussion makes unnecessary a lengthy  
26 analysis of petitioner's second argument viz. that the Hale

1 Butte PUD was not a concrete, recognizable project until at  
2 least the Stage 1 application was filed (February 1980), so  
3 that the right to complete the project cannot be based on  
4 expenditures by MRE before 1980. We have held in the preceding  
5 paragraphs that many if not most of the expenditures relied on  
6 in support of the vested rights claim were made by MRE before  
7 it had secured the required approval.

8 Assuming, arguendo, that MRE's expenditures were lawful,  
9 however, we cannot sustain petitioner's second contention. The  
10 record indicates MRE's expenditures were in furtherance of a  
11 large scale residential project at Hale Butte. Had the  
12 requisite approvals been granted, we believe the county could  
13 take into account the expenditures in question. Clackamas  
14 County v. Holmes, supra; Cook v. Clackamas County, 50 Or App  
15 75, 81-84, 622 P2d 1107 (1980); rev den 290 Or 853.

### 16 Third Argument

17 The county's calculation of expenses incurred by MRE  
18 includes a substantial amount of fees for professional services  
19 (e.g., design, engineering, legal services) relating to the  
20 Hale Butte project. In this argument, petitioner claims the  
21 county erred in basing its vested rights determination in part  
22 on these expenditures. This was error, in petitioner's view,  
23 because the PUD project never received unconditional final  
24 approval from the county. In the absence of such approval,  
25 claims petitioner, the professional expenses should be  
26 attributed only to contemplated use, not actual use of the

1 property. Under the vested rights doctrine a vested rights  
2 claimant must demonstrate the project has "gone beyond mere  
3 contemplated use" and has been committed to an actual use which  
4 would have in fact been made but for the passage of the new  
5 regulation. Clackamas County v. Holmes, supra.

6 This argument echoes petitioner's earlier claim concerning  
7 the physical improvements made by MRE prior to obtaining the  
8 required final approval from the county. What we have said in  
9 connection with that claim applies here also. Again, however,  
10 we note that had the expenditures for roads, sewage and water  
11 systems to serve the PUD been lawful (i.e., installed after the  
12 required approval was obtained) they would bring the project  
13 beyond the stage of mere "contemplated use." Cook v. Clackamas  
14 County, supra; Milcrest v. Clackamas County, 59 Or App 177, 650  
15 P2d 963 (1982).

#### 16 Fourth Argument

17 Petitioner's fourth argument, in essence, replicates  
18 contentions already discussed and accepted by this Board. The  
19 PUD in question did not qualify for vested rights protection  
20 because it had not proceeded sufficiently far in the  
21 approval/development process before there was notice that the  
22 governing land use law had changed. Accordingly, we sustain  
23 this argument.

#### 24 Fifth Argument

25 Petitioner next directs our attention to another of the  
26 vested rights factors recognized in the Oregon case law, i.e.,

1 the extent of the nonconformity of the proposed use as compared  
2 to the uses allowed. See Clackamas County v. Holmes, supra.  
3 Petitioner claims the 111 unit PUD will be seriously  
4 nonconforming with surrounding uses, citing testimony to that  
5 effect by various witnesses at the county's hearings.

6 The county's findings with reference to this vested rights  
7 consideration are as follows:

8 "Although there is no other project exactly like the  
9 proposed MRE PUD in Linn County, there are numerous  
10 areas of rural residences at similar overall densities  
11 scattered around the county, including in the vicinity  
12 of Hale Butte. As part of the basis for its adoption  
13 of ordinance 84-291, this board found that the level  
14 of development in the proposed PUD would be compatible  
with adjacent and nearby uses, and those findings are  
incorporated by reference here. The MRE PUD will  
provide an [sic] unique example of the continued  
co-existence of agricultural and rural residential  
uses on the same ownership, to the benefit of both."  
Record at 29. (emphasis added).

15 Petitioner claims there is not substantial evidence in the  
16 record to support these findings. We must reject the claim,  
17 however, if the record contains evidence a reasonable person  
18 would rely on in reaching the quoted determination. Christian  
19 Retreat Center v. Washington County, 28 Or App 673, 679, 560  
20 p2d 1100 (1977); rev den (1979).

21 As a threshold matter, we have difficulty in accepting the  
22 quoted finding as adequate demonstration the county considered  
23 the factor in question. The finding does not evaluate the  
24 relationship of the proposed (nonconforming) PUD with nearby  
25 uses in any specific way, and it completely fails to consider  
26

1 its relationship to conforming (i.e., allowable) uses under the  
2 statewide goals.

3 Apart from the above problems, we have not been cited to  
4 substantial evidence in the record supporting the quoted  
5 finding. The citations provided by MRE (the county did not  
6 file a brief) do not support the vague finding there are areas  
7 in the vicinity of Hale Butte having a density similar to the  
8 proposed PUD. There may be other relevant evidence in the  
9 voluminous record, but we will not search for it.

10 We sustain the fifth assignment of error.

11 Sixth Argument

12 Petitioner next argues the county's findings under the  
13 fourth factor set forth in Polk County v. Martin are not  
14 supported by substantial evidence. This factor requires  
15 consideration of the extent to which the expenditures relate  
16 more to the nonconforming use than to the conforming use." The  
17 county's findings with respect to this consideration can be  
18 summarized as follows:

- 19 (1) MRE constructed roads to specifications for  
residential use, not agricultural or forest use;
- 20 (2) Brush clearing done in 1968 was carried out so as  
21 to preserve amenities for future residential  
22 development, relevant to accommodate resource  
use;
- 23 (3) Although wells and a well house installed on this  
24 site might have some usefulness for agricultural  
25 purposes the system of 10, 8, 6 and 4 inch mains  
and the 100,000 gallon water storage tank would  
only have real use for residential development;
- 26 (4) Expenditures for professional services

1 (surveying, design of water and sewage systems,  
2 legal fees for drafting,) would be of no benefit  
3 for resource use of the land.

4 (5) The property is not suitable for farm or forest  
5 use; therefore the landowner's expenditures "have  
6 value largely for his planned use of the  
7 property."

8 Assuming for arguments sake the improvements listed above  
9 were lawfully established, some, but not all of them seem as  
10 consistent with uses allowed under Goals 3 and 4 as they are  
11 with completion of the PUD project. We refer here to the first  
12 two items (road construction and site clearing).<sup>20</sup> We thus  
13 do not believe these items were appropriate for inclusion in  
14 the vested rights formulation.

15 We reject petitioner's claim with respect to the third and  
16 fourth items. We believe the county's findings show these  
17 expenditures are clearly related more to the PUD use than to a  
18 resource use of the property.

19 Finally, the fifth item represents a conclusion of law  
20 which this Board has once determined could not be reached based  
21 on a similar record. Mason v. Linn County, \_\_\_ Or LUBA \_\_\_,  
22 LUBA No. 83-036 (1983). The county's conclusion relates to the  
23 suitability of the property for conforming uses under the  
24 goals, an issue pertinent to the applicability of those goals,  
25 not to the vested rights claim at issue here.

26 Based on the foregoing, we sustain petitioner's sixth  
argument in part. Because the findings concerning roads and  
site clearing are not adequate to demonstrate these

1 expenditures are more consistent with the PUD than uses allowed  
2 by the goals, they should not weigh in favor of the vested  
3 rights determination. A remand is in order.

#### 4 Seventh Argument

5 Petitioner next claims the county's findings with respect  
6 to the so-called "ratio test" are unsupported by substantial  
7 evidence. The test requires consideration of the ratio between  
8 the expenditures by the vested rights claimant prior to the  
9 change in law and the total cost of the project. Clackamas  
10 County v. Holmes, supra. As noted earlier, the county  
11 determined the total cost of the Hale Butte PUD was  
12 approximately 1.8 million dollars. The county further  
13 concluded the ratio test yielded results favorable to MRE's  
14 vested rights claim, whether its expenditures were measured  
15 when (a) the property was first zoned (1971), (b) statewide  
16 goals were adopted (1975), (c) LCDC first advised the county  
17 its resource goal exceptions for the Hale Butte site were  
18 inadequate (February, 1982), or (d) Petitioner Mason appealed  
19 the planning commission's approval of the Stage 3 plan to the  
20 county governing body (September, 1982).<sup>21</sup>

21 Petitioner presents three challenges to the county's  
22 application of the ratio test.<sup>22</sup> We sustain only the third  
23 challenge, as discussed below.

24 Petitioner first directs our attention to discrepancies  
25 between the county's estimate of the total project cost (1.8  
26 million dollars) and a significantly higher estimate (3.8

1 million dollars) of the same item made in findings previously  
2 adopted by the county in connection with Stage 3 approval of  
3 the project. According to petitioner, the discrepancies  
4 suggest the county's findings in the present case are not  
5 supported by substantial evidence. However, petitioner does  
6 not explain why conflicts with previously-made findings  
7 undermine the evidentiary support for the vested rights  
8 determination in question. We will not speculate on the theory  
9 underlying petitioner's claim.<sup>23</sup>

10 One question raised by the petition in connection with the  
11 county's estimate of total costs merits further discussion. We  
12 note the final order appears to assume the total cost for the  
13 residential PUD should include only costs required to prepare  
14 the land for eventual construction of residences. However, in  
15 Webber v. Clackamas County, 42 Or App 151, 155, 600 P2d 448  
16 (1979); rev den 288 Or 81, the Court of Appeals indicated that  
17 application of the ratio test to a large scale residential  
18 project requires inclusion of all development costs in the  
19 "total costs" component of the ratio test. Thus, the county's  
20 failure to consider the cost of completion of residences and  
21 other amenities in the Hale Butte PUD was error. We cannot  
22 conclude this aspect of the decision is supported by  
23 substantial evidence in the absence of data on this point.  
24 Remand of the county's decision is therefore in order.

25 Petitioner's second challenge to the evidentiary support  
26 for the county's estimate of the total project cost concerns

1 the finding that approximately \$100,000 was expended on the  
2 project by MRE between 1967 and 1968. The arguments here  
3 mirror those discussed in the proceeding paragraphs, i.e., (1)  
4 there is a discrepancy between the estimate accepted by the  
5 county in this case and the estimate of the same item appearing  
6 in the order previously adopted by the county and (2) the  
7 evidence of the \$100,000 expenditure, consisting of affidavits  
8 supplied by MRE, is not substantial evidence. For the reasons  
9 stated earlier, we find neither claim persuasive.

10 Petitioner's final challenge in connection with the ratio  
11 test is that the county erred in basing its calculation of  
12 MRE's expenses on those made before the developer obtained the  
13 required governmental approvals. We have previously sustained  
14 this argument. No further discussion is required.

15 In summary, we conclude the county's analysis of the ratio  
16 test is in error. The total cost of the project must include  
17 an estimate of the costs of completion of the residences on the  
18 111 homesites, including the amenities associated with the  
19 PUD.

#### 20 Eighth Argument

21 Petitioner's final argument concerns the date on which MRE  
22 was on notice its proposed PUD might conflict with statewide  
23 planning goals. The date of this notice is pertinent under the  
24 second vested rights doctrine. Clackamas County v. Holmes,  
25 supra.

26 We find it unnecessary to discuss this argument at length.

1 In our view, the dispositive point is that prior to the  
2 county's grant of Stage 3 approval of the PUD, public notice  
3 was available that (1) Statewide Goals 3 and 4 prohibited  
4 residential development of the site; and (2) the county's  
5 exceptions to those goals were inadequate.

6 Reversed in part, remanded in part.

1

The county ordinance provides for PUD approval in three stages. The first consists of an administrative review of the general outline of the proposal and a discussion with the applicant of the governing standards. Section 26.120 Linn County Zoning Ordinance. The second stage involves preliminary review of the proposal by the planning commission and the governing body. *Id* at Sections 26.125 and 26.130. The final stage involves planning commission review of the complete proposal, with appeal available to the governing body. *Id* at Section 26.135. MRE completed stage one early in 1979. Stage two approval was granted on June 11, 1980. Final approval was granted in March, 1983.

---

2

We have jurisdiction over the vested rights determination pursuant to ORS 197.825. See Forman v. Clatsop County, 297 Or 129, 681 P2d 786 (1984).

---

3

Section 28.050(3) of the ordinance requires the governing body to "provide an opportunity for the appellant, interested persons and the general public to be heard." However, the ordinance does not elaborate on the procedure to be followed.

---

4

We note that another portion of the petition does allege prejudice as the result of the county's failure to provide certain kinds of procedural safeguards, e.g, depositions and cross-examination of adverse witnesses. However, the statute relied on in petitioner's first procedural argument, ORS 215.412, is worded in general terms; it does not mandate adoption of any particular safeguards before a hearing is commenced.

---

5

As Respondent County points out, petitioner was permitted to submit written questions to the applicant's witness and the questions and answers were made a part of the county's record. See Linn County's response to petitioner's objection to record at 2. The suggestion seems to be that petitioner waived or withdrew his objection (on the cross-examination issue) by

1 consenting to the alternate procedure. If this is respondent's  
2 point, we disagree. Having raised the objection, petitioner  
3 preserved it for purposes of appeal. We are cited to no  
4 evidence that the objection was withdrawn.

5  
6

7 We note the Court of Appeals held that cross-examination  
8 need not be provided in the context of quasi-judicial plan  
9 amendment hearing in South of Sunnyside Neighborhood League v.  
10 Board of County Commissioners of Clackamas County, 27 Or App  
11 647, 663-664, 557 P2d 1375 (1976), reversed 280 Or 3, 569 P2d  
12 1063 (1977). However, the weight of that holding is in some  
13 doubt in view of the fact that when the case reached the state  
14 Supreme Court, it was held the cross-examination issue had not  
15 been properly raised and therefore "...was not properly before  
16 the Court of Appeals or this court for review," 280 Or at 10.

17 Moreover, it is by no means clear the Court of Appeal's  
18 procedural ruling in Sunnyside would extend to the type of  
19 local land use determination (i.e., vested rights) at issue  
20 here. When Sunnyside was decided by the Court of Appeals, the  
21 understanding was that exclusive jurisdiction to adjudicate  
22 vested rights/nonconforming use claims resided in circuit  
23 court, where cross-examination is a tool available to the  
24 parties. See Eagle Creek Rock Prod. v. Clackamas County, 27 Or  
25 App 371, 556 P2d 150 (1976); rev den 278 Or 157 (1977). More  
26 recently, when the Court held that legislative changes had  
27 empowered local government tribunals to adjudicate vested  
28 rights claims, it also took care to note the parties had not  
29 questioned whether "...the procedures employed by the county in  
30 making its vested rights determination complied with the  
31 requirements of due process." Forman v. Clatsop County, 63 Or  
32 App 617, 619, n. 1, 665 P2d 365 (1983). We note the  
33 circumstances only for the purpose of pointing out that there  
34 may be distinctions between vested rights and other types of  
35 local land use proceedings from the stand point of required  
36 procedure. We need not examine those possible distinctions  
37 here. But see Jarrel v. Board of Adjustment, 258 NC 476, 128  
38 SE2d 879 (1963) (upholding claim to trial type procedure in  
39 local proceeding to determine nonconforming use claim).

7 Martin did not involve a vested rights dispute. However,  
8 in a footnote the Court reiterated previous case law with  
9 respect to the factors to be considered in such a dispute.  
10 Since the petition refers to the factors as set forth in  
11 Martin, we do also.

1 8

2 The remaining acreage was purchased in 1976.

3 9

4 According to the final order, the landowner opened a quarry  
5 on the site to provide rock for the street improvement projects.

6 10

7 The 1972 rezoning of MRE's land separately classified the  
8 10 acres previously approved for the 15 unit subdivision. The  
9 new classification, SR (Suburban Residential), did not alter  
10 the minimum lot size.

9 11

10 The county eliminated the provision allowing two dwellings  
11 per lot in 1977. However, the density allowed under the 1972  
12 ordinance was restored in 1978, when the entire site was  
13 rezoned from ART-5 to ART-2 1/2.

13 12

14 The approval states "Your plans to supply water to 15 lots  
15 in the phase I development of the Mountain River  
16 Subdivision...has been reviewed and approved...." Record at  
17 418. It is clear the approved plan did not indicate details of  
18 future phases of the project. An April, 1980 comment by the  
19 Health Division on MRE's State 2 PUD describes the earlier  
20 approval as covering only "water system facilities to serve 15  
21 lots in Mountain River Estates." Record at 328.

18 13

19 The June, 1980 order indicates that no opposition was  
20 received at the Stage 2 hearings. However, it is also noted  
21 that shortly after Stage 2 approval was granted, Petitioner  
22 Mason complained he had not received notice of the hearings.  
23 Petitioner's request for rehearing of Stage 2 approval was  
24 denied, but he was assured his concerns could be raised at the  
25 Stage 3 proceedings.

23 14

24 The county evaluated the stages of the project under the  
25 vested rights factors as of four different dates due to its  
26 uncertainty as to when the project in question became  
nonconforming, i.e., impermissible because of the restrictions  
imposed by the statewide planning goals.

15

As the Court of Appeals noted in Eklund v. Clackamas County, 36 Or App 73, 81, 583 P2d 567 (1978), "[n]one of these factors is predominant; they are merely guidelines in assessing the evidence and deciding the issue."

---

16

A prohibition on development prior to approval of a planned development dates back to the county's 1969 Interim Zoning Ordinance.

---

17

For example, petitioner notes that following the 1978 rezoning order, the county advised MRE that a condition of approval was that "the indicated PUD must be approved prior to any development." The same quote was made on other occasions as the project took shape.

---

18

We recognize that ORS 92.040 and the county land division ordinance bind the county once preliminary subdivision plat approval is granted. Bienz v. City of Dayton, 29 Or App 761, 768-67, 566 P2d 904 (1977). As we read the Linn County PUD Ordinance, however, it is Stage 3, not Stage 2, which is most analogous to the preliminary plat phase of subdivision development.

---

19

For example, correspondence between the county and MRE shortly after Stage 2 approval was granted indicated that the approval was of the "plan in concept" and that actual location of houses, roads etc. would be reviewed at Stage 3. Also, Petitioner Mason was advised by county planning officials that the county's failure to notify him of Stage 2 hearings would not be prejudicial because he could raise objections to the specific of MRE's project at the Stage 3 level.

---

20

Indeed, petitioner points out evidence in the record indicating that the road system installed by MRE would have utility in a tree farming operation. Record at 607-09.

---

21

As noted earlier, the county's final order (understandably)

1 reflects doubt as to when the governing land use law (the  
2 statewide goals) rendered the Hale Butte PUD nonconforming.  
3 For purposes of this aspect of the petition, it is sufficient  
4 to note that MRE concedes it had at least constructive notice  
5 of the legal obstacles the goals presented to its project in  
6 February 1982 when LCDC rejected the county's goal exceptions.  
7 See Brief of Participant at 22.

8  
9 

---

22

10 Of course, we recognize this factor need not be considered  
11 if the improvements in question were not lawful when installed,  
12 a conclusion we have reached in this case. Our discussion of  
13 this issue is nevertheless required however by ORS 197.835(9).

14  
15 

---

23

16 Although petitioner places emphasis on the discrepancies  
17 between the two orders adopted by the county, he does point to  
18 one portion of the record containing conflicting evidence on  
19 the total cost issue. Evidently, petitioner's engineering  
20 expert gave a substantially higher estimate of the total cost  
21 of the PUD's sanitary sewer system than did the expert for  
22 MRE. The county resolved the conflict in favor of MRE because  
23 of its expert's "greater experience with the project and the  
24 conditions on the site." Record at 20.

Petitioner attacks the county's finding on this point on  
grounds it is not supported by substantial evidence. However,  
the challenge must be rejected. The mere existence of a  
conflict in the evidence for local decisionmakers provides no  
basis for intervention by this Board under the substantial  
evidence test. The county could reasonably rely on the expert  
evidence offered by MRE; we cannot say the conflicting evidence  
cited by petitioner compels a different result under the  
substantial evidence test. Metropolitan Homebuilders of  
Portland v. Metro, 54 Or App 60, 63, 633 P2d 1320 (1981).

1                                   BEFORE THE LAND USE BOARD OF APPEALS  
2                                   OF THE STATE OF OREGON

3 ROBERT MASON,                                    )  
  )  
4                    Petitioner,                    )                   LUBA No. 84-072  
  )  
5                    vs.                             )                   ORDER ON REMAND  
  )  
6 LINN COUNTY and                                 )  
MOUNTAIN RIVER ESTATES, INC.                 )  
7    )  
  )                   Respondents.  
8

9            The Court of Appeals has remanded this case to the Board.

10   In pertinent part, the Court's opinion states:

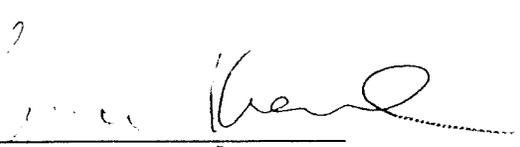

11        "Respondent's first assignment of error under his  
12        cross-petition also turns on LUBA's disposition of MRE  
13        positions that presuppose that the development that  
14        occurred was permitted. Although LUBA reversed the  
15        county's decision in its ruling on the lawfulness  
16        issue, LUBA concluded that its resolution of some of  
17        the other issues required a partial remand to the  
18        county for further proceedings on those issues.  
19        Respondent argues that LUBA's resolution of the  
20        lawfulness issue renders the other issues moot and  
21        that LUBA's disposition should have been an outright  
22        reversal rather than a partial remand. MRE  
23        acknowledges that 'practical effect of LUBA's reversal  
24        \* \* \* [renders] moot the issue remanded to the  
25        County.' MRE argues, however, that ORS 197.835(9)  
26        requires LUBA to 'decide all issues presented to it  
27        when reversing or remanding a land use decision.' MRE  
28        also points out that one of the issues that LUBA  
29        remanded to the county involved the sufficiency of the  
30        county's findings and that OAR 661-10-070(1)(b)(C)(i)  
31        requires a remand under those circumstances.

32        "It is futile for the county to consider on remand how  
33        other issues might affect the vested rights  
34        determination when LUBA and we have held that a  
35        condition precedent to the existence of a vested right  
36        is absent. Moreover, the requirement of ORS  
37        197.835(9) that LUBA decide all issues does not mean  
38        that LUBA must base its disposition on an appeal on  
39        moot issues. See Perkins v. City of Rajneeshpuram, 68

1 Or App 726, 686 P2d 369, rev allowed 298 Or 238  
2 (1984). ORS 197.835(1) provides that LUBA 'shall  
3 adopt rules defining the circumstances in which it  
4 will reverse rather than remand a land use decision  
5 that is not affirmed.' The decision to remand the  
6 county's order in part is for LUBA to make in the  
7 first instance. On the cross-petition we remand the  
8 order for LUBA to reconsider in the light of this  
9 opinion, whether a partial remand to the county is  
10 necessary. Accordingly, it is unnecessary for us to  
11 address the remaining assignments under the  
12 cross-petition." 73 Or App at 340-41.

8 Based on the foregoing, the portions of our former opinion  
9 ordering remand of the county's decision are vacated. The  
10 decision is reversed.<sup>1</sup>

11 Dated this 3rd day of October, 1985.

---

1 On September 26, 1985 a member of the Board conducted a conference with all counsels by telephone. Counsels were in agreement that entry of an order of reversal was the appropriate action at this time.
