

Pesticide Advisory

Alert – Olivia’s Solutions, Inc.’s Olivia’s Cloning Gel product contains indole-3-butyric acid

July 21, 2016

The Oregon Department of Agriculture (ODA) has reason to believe the product Olivia’s Cloning Gel, manufactured by Olivia’s Solutions, Inc., contains a pesticide active ingredient, indole-3-butyric acid, not listed on the label. ODA’s advisory is based on Washington State Department of Agriculture’s (WSDA) laboratory testing and confirmation of undeclared pesticide active ingredients. ODA is currently undergoing sampling and testing of this product in Oregon.

Use of Olivia’s Cloning Gel could cause cannabis to fail Oregon Health Authority (OHA) pesticide testing requirements. Growers of all crops and retailers are advised to discontinue using or selling Olivia’s Cloning Gel until further notice.

For additional information or questions, please contact ODA at (503) 986-4635, email pestx@oda.state.or.us or visit our website at: <http://www.oregon.gov/ODA/programs/Pesticides/Pages/CannabisPesticides.aspx>
