

Pesticide Advisory

Alert – Rambridge Wholesale Supply’s Frost Protection Plus product contains salicylic acid

July 21, 2016

The Oregon Department of Agriculture (ODA) has reason to believe the product Frost Protection Plus, manufactured by Rambridge Wholesale Supply, contains a pesticide active ingredient, salicylic acid, not listed on the label. ODA’s advisory is based on Washington State Department of Agriculture’s (WSDA) laboratory testing and confirmation of undeclared pesticide active ingredients. ODA is currently undergoing sampling and testing of this product in Oregon.

Use of Frost Protection Plus could cause cannabis to fail Oregon Health Authority (OHA) pesticide testing requirements. Growers of all crops and retailers are advised to discontinue using or selling Frost Protection Plus until further notice.

For additional information or questions, please contact ODA at (503) 986-4635, email pestx@oda.state.or.us or visit our website at: <http://www.oregon.gov/ODA/programs/Pesticides/Pages/CannabisPesticides.aspx>
