

## Timeline for EVR Dealer Transition to New EVR Integrator

**7/1/2016**

The new Integrator (Vitu) officially starts providing EVR Services. Pilot project begins to demonstrate the system operates correctly. As each of the 9 pilot dealers are brought online, Vitu will start working with additional dealers.

If you intend to use Vitu as your EVR Integrator, contact them as early as possible. This will ensure you are on their schedule to bring online. This includes software installation and training of your staff. (This requires approximately 1-2 days.)

Continue to request inventory orders from Irwin Hodson.

Work with CVR (Irwin Hodson) to reconcile your physical inventory against your inventory management reports.

Once your Vitu installation becomes operational, you can submit EVR transactions to either Vitu or continue using CVR until the cutoff date. EVR services through CVR will no longer be available.

**7/31/2016**

**8/1/2016**

DMV recommends that you complete all open CVR transactions before the CVR cutoff date of 8/17/16. This ensures that all transactions are completely processed.

8/17/16 – if you have started CVR transactions but no inventory has been issued:

- Delete the transaction from the system. Then,
- Submit it to Vitu, or
- Print it out & submit it to a DMV Field Office or
- Mail it to DMV Vehicle Mail 1 (VM1).

If inventory was issued but the transaction was not completed, print the transaction and submit it with fees to DMV VM1 for processing.

**9/1/2016**

Plan to return all DMV inventory in your possession to CVR (Irwin Hodson) no later than 9/2/16.

CVR must return all their remaining inventory to DMV by 9/14/16.

CVR contract with DMV ends 9/17/16.

**10/1/2016**
