

DET4786.dgn 01-NOV-2021

DET4786

TEMPORARY PEDESTRIAN ACCESSIBLE ROUTE (TPAR)
SIDEWALK DIVERSION WITH ADDITIONAL RIGHT OF WAY
FULL CORNER CLOSURE

NOTES:

- This Detail is intended for the work area that does not extend into the travel lane; and, where existing shoulder widths are 6 feet (min.). If shoulders are less than 6 feet, propose an alternate route.
- TPAR utilizing space behind walks shall be used within ODOTs right of way or within a temporary right of way easement.
- TPAR must meet or exceed current level of accessibility. If conditions in the field for the designated route do not meet the accessibility conditions, the Contractor may proposed an alternate route. Alternate routes require the approval of the Engineer.
- Only TCD for pedestrians are shown. Additional vehicular traffic control measures may be required.
- Utilize existing pedestrian facilities during ramp closures to maintain pedestrian accessibility.
- Verify TPAR is provided when multiple intersections are under construction.
- Maintain any business access located directly within the work zone.
- To be accompanied by Dwg. No. TM844.
