REPORT OF LIMITED VISION EXAMINATION

FOR LIMITED VISION DRIVERS WITH BIOPTIC TELESCOPIC LENS

(ORS 807.359; ORS 807.363; ORS 807.369)

The medical information in this report is confidential and will be used by the Driver and Motor Vehicle Services (DMV) only to determine the qualifications of the person to operate motor vehicles.

INSTRUCTIONS TO APPLICANT:

1. Take this certificate to the licensed vision specialist of your choice and have a vision examination.
2. After the vision specialist conducts the examination and completes the certificate:
 - **FAX (503) 945-5329** or mail completed form to **DMV Driver Safety Unit, 1905 Lana Ave NE, Salem, OR 97314**; or
 - **Return completed form to a local DMV office.**

VISION SPECIALIST – COMPLETE THIS SECTION

VISION SPECIALIST CERTIFICATION

Applicant must have visual acuity in the better eye with best lens correction that is no better than 20/80 and no worse than 20/200, and visual field of at least 120 degrees horizontally and 80 degrees vertically to be eligible to drive under the limited vision condition program.

I have determined:

- There is no ocular diagnosis or prognosis of deterioration of applicant's corrected vision below a 20/200 level of visual acuity.
- Applicant has a visual field of at least 120 degrees horizontally and 80 degrees vertically.
- Applicant would be aided by using a bioptic telescopic lens when operating a motor vehicle.
- Applicant has been fitted with a bioptic telescopic lens mounted on the carrier lens.

Daylight Only.

Applicant's vision does **not** prohibit the ability to safely operate a vehicle at night.

Limited Vision Condition Program: Using A Biotopic Telescopic Lens

Who is eligible? A person otherwise eligible for Oregon driving privileges whose vision meets the following criteria:

- Visual acuity in the better eye with best lens correction that is no better than 20/80 and no worse than 20/200.
- Has no ocular diagnosis or prognosis that may result in deterioration of the person's corrected vision below a 20/200 level of visual acuity;
- Has a visual field of at least 120 degrees horizontally and 80 degrees vertically; and
- Would be aided by using a biotopic telescopic lens when operating a motor vehicle.

What driving privilege is the person eligible for? A Class C license (or instruction permit) with the following restrictions:

- Driving during daylight hours only;
- Driving only when the person is using a biotopic telescopic lens.

The daylight restriction will be removed when the person completes the following steps:

- Is examined by a vision specialist who indicates on a report submitted to DMV that the person's vision does not prohibit the ability to safely operate a motor vehicle at night.
- Provides a certificate from a rehabilitation training specialist stating the person has successfully completed nighttime training and can safely operate a vehicle at night.

What are the steps to be licensed under this program? The person must complete the following steps:

- Be examined by a vision specialist who completes a report to DMV showing the person's vision meets the criteria to be licensed under this program.
- Be fitted by a licensed vision specialist with a biotopic telescopic lens mounted on the carrier lens.
- Enroll in a rehabilitation training program offered by a specialist certified by DMV to train low vision condition persons in the use of a biotopic telescopic lens while driving.
- Pass DMV's written knowledge test.
- Be issued by DMV a special limited vision condition learner's permit to be used during driver training.
- Submit to DMV a certificate issued by a rehabilitation training specialist certifying that the person has successfully completed a rehabilitation training program.
- Pass DMV's drive test.

What fees are applicable to a special limited condition learner's permit?

- Class C knowledge test – \$5.00
- Special limited condition learner's permit – \$13.00

What other requirements of this program are there?

- The special limited condition learner's permit can only be used to drive with a certified training specialist as part of the rehabilitation training program.
- To be issued a Class C driver license, a driver under 18 years of age must meet all the requirements of a provisional license, which include having an instruction permit (this differs from a special limited condition learner's permit) for a minimum of six months and having completed a Driver's Education Course (not the specialized training required by this program) and 50 hours of supervised driving or have 100 hours of supervised driving prior to being issued a provisional license.
- Every two years, the person must provide a new certification from a licensed vision specialist.

How do I make a drive test appointment? To schedule a drive test appointment, call the DMV Field Services Support Section at (503) 945-5523.
