Route Map 6 - Displays authorized annual routes (up to 14' wide) for Mobile/Modular Units. Operations by permit only.

NOTE A
Mobile homes or modular units exceeding 12 feet in width, but not exceeding 14 feet in width, may proceed down the extension only during bare pavement conditions.

Movement is not allowed when ice or snow is present on the highway, whether or not the highway has been sanded.

NOTE B
The movement of two wide loads each exceeding 12 feet in width, traveling in opposing directions through the City of Sisters, is not allowed through a six block section of the downtown merchant area between South Pine Street and South Larch Street due to horizontal width constraints. The lead pilot vehicle operator is responsible for ensuring that there are no overloads over 12" in width entering this restricted section from the opposite direction before the permitted vehicle enters the width restricted section. Pilot vehicles escorting wide loads exceeding 12" in width must announce their approaching presence on CB radio channel 19 prior to entering the six block section of the downtown merchant area between South Pine Street and South Larch Street. In the event of an oncoming oversize load, one of the lead pilot vehicle operators must direct his piloted load to wait and allow the approaching oversize load to pass safely before proceeding.
