

Activity 081 Stockpile Maintenance Materials

Description

Activity 081 involves purchasing, manufacturing, preparing, mixing, loading, and storing maintenance materials, including actions to protect and shelter the materials, where the material is both obtained and stockpiled in the same day. If not stockpiled almost immediately charge to Activity 083. It includes material produced on material production contracts that will not be used almost immediately.

This Activity also involves any material that is purchased or acquired from ODOT construction contracts as excess material. For that situation, the District Manager must work with the Project Manager to process a Journal Entry to credit the construction contract for the value of the material purchased or acquired from the contract.

General Information

Refer to discussion in the General Instructions section preceding Activity 014 in this section of the *Maintenance Guide* for additional information including environmental and traffic control recommendations and other important considerations.

As each material is used or incorporated into the work, charge the material to the Activity under which it was used by entering appropriate information on the Daily Time Card or by processing a Journal Entry.

Measurement of Accomplishment, Expenditure Account, Charge Activity

Measurement is number of worker hours involved. Expenditure account type is Material EA; use a sub job appropriate for the crew performing the work.

- Charge all costs to Activity 081.
