## Construction starting on I-84 at Sandy River Bridges

Work is scheduled to begin in late April on Interstate 84 at the Sandy River Bridges.

Contractors for the Oregon Department of Transportation will replace the freeway bridges over the Sandy River and repair the bridges over nearby Jordan Road. The \$73.6 million project is expected to take nearly four-years.

Motorists in the area are advised to watch for roadside work crews and occasional single-lane closures in the coming weeks. Parking availability for local recreational use along Jordan Road and near Lewis & Clark State Park will be reduced as the contractor establishes staging areas for construction equipment and materials, mainly on the east side of the Sandy River.

The project, awarded to Hamilton Construction Company of Springfield, is scheduled for completion by November 2013. More information on this and other projects in the Columbia River Gorge corridor is available at [www.ODOTgorgeprojects.org](http://www.ODOTgorgeprojects.org).

Drivers should visit [www.TripCheck.com](http://www.TripCheck.com) or call 511 for current traffic advisories.
