

## TRAFFIC ADVISORY

### **West side of Bridge Ave. closed on Sunday**

*Slide repair work to close one of the two U.S. 30-to-Bridge Avenue connections*

The Oregon Department of Transportation will close the west side of the Bridge Avenue approach to the St. Johns Bridge on Sunday, May 18, from 6 a.m. to 3:30 p.m. The closure will allow crews to complete hillside stabilization work to the south of Bridge Avenue following a recent slide in the area.

**The St. Johns Bridge will be accessible to all traffic from the east side of Bridge Avenue during the slope repair work.** During the closure, motorists traveling on eastbound U.S. 30 (Lower Columbia River Highway) will not be able to turn onto Bridge Avenue to access the St. Johns Bridge. Motorists traveling south across the St. Johns Bridge will only be able to turn left onto the east side of Bridge Avenue as they leave the St. Johns Bridge.

Springville Road and Germantown Road will remain open to motorists during the hillside repair work.
