

## TRAFFIC ADVISORY

### **Beam placement to cause delays Monday on Highway 219**

A contractor for the Oregon Department of Transportation will deliver and place six pre-stressed concrete beams on Monday, April 9, for a bridge being built across Christensen Creek on Highway 219, between Farmington Road (Highway 10) and Bald Peak Road in Washington County. **To safely off-load and place the beams, both directions of Highway 219 will be closed for 10 to 20 minutes per beam.** The beam placement work is expected to take place between 9 a.m. and 1 p.m. on Monday. Flaggers will be present to control traffic.

#### **Highway 219 project**

The contractor for ODOT began construction on a project on Highway 219 (Hillsboro-Silverton Highway) at Farmington Road last fall. This safety project will widen the highway in order to build left and right turn lanes for motorists turning onto Farmington Road. In addition, the bridge over Christensen Creek is being reconstructed in a wider configuration, and Farmington Road will be realigned to the north approximately 40 feet. Once completed, motorists on Highway 219 will have a safe refuge to wait for oncoming traffic to clear before turning onto Farmington Road.
