

TRAFFIC ADVISORY

Traffic signal work on Highway 99E/McLoughlin Blvd.

An electrical crew with the Oregon Department of Transportation is installing new traffic signal heads on Highway 99E/McLoughlin Boulevard between Park Avenue in Milwaukie and Gloucester Street in Gladstone through Monday, April 23. The electrical work is scheduled to take place from 9 a.m. to 3:30 p.m. on weekdays. There will be intermittent closures of the left-turn lanes in both directions of McLoughlin Boulevard at the nine locations where the electrical crews are installing the upgraded traffic signal heads. The lane closures will be approximately two to four hours for each signal installation. When the crews are finished with one signal location, they will reopen the turn lanes and move on to the next installation.
