

## TRAFFIC ADVISORY

### **Tonight: I-205 lane, ramp closures for trailer off-load**

The Oregon Department of Transportation will close the right two lanes of southbound Interstate 205 prior to the Killingsworth Street exit tonight from 11 p.m. to 3 a.m. to allow crews to safely off-load a truck trailer that broke early this morning. Two lanes of southbound I-205 are expected to remain open during the work. The Killingsworth Street exit and the ramp connecting eastbound Airport Way to southbound I-205 will be closed during tonight's operation.

Earlier today, workers with the trucking company attempted to re-weld the trailer, which was transporting a windmill equipment load of approximately 85,000 pounds, but were unable to make the fix on-site. Two 50-ton cranes will be brought in tonight to pick the windmill equipment and reset it on another trailer.

Motorists may encounter some delays and are asked to drive safely through the area.
