

Construction Impacts

construction will begin late 2016/early 2017

During construction, road users should expect increased congestion, intermittent flagging, detours and delays in the project area - day and night - throughout construction. The majority of the work will happen during the day. Nighttime noise may be audible to those nearby.

⇒ *PEDESTRIANS*: There will be short-term sidewalk closures. A signed ADA-accessible pedestrian detour will be provided.

⇒ *BIKE RIDERS*: The existing bike lanes will be closed throughout construction and signs will direct bicycle riders to use the motor vehicle travel lane

⇒ *TRANSIT USERS*: Trimet bus stops in the project area may be temporarily closed/relocated

⇒ *BUSINESS and RESIDENTIAL DRIVEWAY*: There will be unavoidable short-term business driveway closures. ODOT will work individually with each business to schedule the closures and ensure business access. There may be delays departing business and residential driveways due to the increased congestion, with occasional flagging
