Truck Weight Limits

Legal Operating Weight
The legal operating weight of a truck is determined by the:
- Tire size.
- Number of axles.
- Wheelbase of the vehicle or combination of vehicles.

Legal Gross Weight
In Oregon, the maximum legal gross weight is 80,000 pounds.

Single Axle
The gross weight a single axle cannot exceed is limited to the lowest of:
- 600 pounds per inch of tire width on the tires.
- The tire manufacturer’s sidewall rating.
- 20,000 pounds.

Tandem Axle
The gross weight of a tandem axle is limited to the lowest of:
- 600 pounds per inch of total tire width on the tires.
- The tire manufacturer’s sidewall rating.
- 34,000 pounds.

Vehicle or Combination of Vehicles
Gross weight of a vehicle or combination of vehicles is limited to the lowest of:
- 600 pounds per inch of total tire width on the tires.
- The tire manufacturer’s sidewall rating.
- 20,000 pounds on a single axle.
- 34,000 pounds on a tandem axle.
- The group axle weights shown on Weight Table 1.
- 80,000 pounds gross weight.
Operating In Oregon

Before operating in Oregon, combinations with a total gross weight between 80,001 and 105,500 pounds must get an Annual Extended Weight Permit.

For more information about oversize/overweight permits:

- Visit the ODOT Commerce and Compliance Division website.
- Or, call 503-373-0000.

Exceptions to the Above Weights

Exception 1

Two consecutive sets of tandem axles spaced 30 feet or more apart may have a gross weight of 34,000 pounds each and operate without a permit on all non-Interstate highways.

A permit is required for operations on Interstate highways, unless the spacing is 36 feet or greater.

Exception 2

Four axles consisting of a set of tandem axles and two axles spaced nine feet or more apart may have a gross weight of 70,000 pounds IF the distance between the first and fourth axle is 35 feet or more.

A permit is required for operations on Interstate highways.

Exception 3

An additional 550 pounds is allowed for fully functional idle reduction systems.

Exception 4

An additional 2000 pounds is allowed for a vehicle that uses natural gas as its fuel source.
