

I-5 AT I-84 REHABILITATION PROJECT

Banfield Interchange Bridge Deck

Major closures to Interstate 84 ramps connecting to Interstate 5 this summer

ODOT is replacing the concrete and steel on the ramps that carry 147,000 vehicles on an average day. This work is needed to keep these bridges functioning for you for decades to come.

Why do the bridges need to be closed for two weeks?

After crews complete repairs to the bridge joints, remove existing concrete and place new concrete, the concrete will need time to cure before traffic uses the bridges. Currently, we expect curing time to take at least three days. Placing traffic on the bridge before the concrete has time to cure will result in rapid deterioration of the new surface. That results in wasted time and funds and more closures in the future.

Rehabilitating the busiest interchange in the state means closures

147,000 vehicles a day on average travel through I-84 at I-5.

1964: I-84 at I-5 interchange opened.

1995: The last time concrete was replaced at the interchange.

2018: Two week closures on each ramp in July and August for new concrete and steel joints and rail.

5 a.m. to 11 p.m. expect gridlock on I-84 and nearby streets during ramp closures during the multi-day closures.

July-December 2018 is when construction is occurring.

Three of the bridges will close 24-hours a day for up to two weeks. In addition to the two week closures, ramps will close overnight from 10 p.m. to 5 a.m. and possibly for full weekends through November. Dates posted on i84Construction.org when available.

How will these closures affect my commute?

During the closures, we expect delays from 5 a.m. to 11 p.m. on I-84 and surrounding interstates. Travelers should consider alternative transportation.

Will city streets see congestion during the closures?

City streets will also see delays due to people avoiding the backups on I-84. Even if you do not use I-84, expect to see congestion on the city streets that you depend on every day.

WHAT TRAVELERS CAN DO

Telecommute

Adjust work schedule to avoid peak period of travel

Avoid the area

Take transit

Ride a bike

Take a vacation

I absolutely must drive this route and plan to sit in the traffic. What are the detour routes?

During the ramp closures, travelers do have the options of following detours that will take you to your destination using the available ramps and Interstate 405. But it will be a long, frustrating drive.

What is ODOT doing to help deal with the expected gridlock?

We are working with the City of Portland, Multnomah County, TriMet and C-Tran to address the increase in congestion on alternate routes. Details about how we plan

to help our streets work better during the closure will be available in early summer.

Where can I sign up for construction updates and learn more?
