ODOT will soon begin construction on a project to repair a number of freeway ramps along Interstate 405. These repairs will improve the condition and maintain the long-term safety and use of this heavily traveled freeway.

Construction begins in the spring of 2019 and lasts through the fall of 2020. This work requires closing lanes, shoulders and on- and off-ramps along I-405, U.S. 30, Interstate 5 and U.S. 26.

The actual work will take place on I-405 on either side of the Fremont Bridge and on the ramp from I-405 north to U.S. 26 west. Three freeway ramps will receive new concrete surfaces. The on- and off-ramp closures are needed to maintain a safe work zone for construction staff.

TRAFFIC IMPACTS

Some sidewalks, lanes and parking on local roads will close as well. Find detailed information about traffic impacts inside.

RAMP CLOSURES

In order to complete the work, on- and off-ramps in the project area will experience intermittent closures, including nighttime, weekend and extended closures. See maps for ramp closure locations.

Approximately 25 weekend closures are expected throughout the project. Some weekend ramp closures will happen simultaneously. This number could change based on weather or site conditions.

Weekend closures will start as early as 8 p.m. on Friday and will end by 10 a.m. on Monday.

CONSTRUCTION NOISE

Daytime and nighttime construction noise will take place periodically, and those working or living in the area may hear the noise.

Multiple overnight closures of on- and off-ramps and lanes will take place for nighttime construction work. Night work is needed in order to minimize traffic impacts during the day.

CONSTRUCTION NOISE (continued)

Noise will come from heavy equipment, construction trucks, the beeping noise when vehicles are in reverse (a requirement by the Occupational Safety and Health Administration), and equipment such as concrete saws, drills and jackhammers.

ODOT will apply standard construction noise mitigation measures to reduce noise impacts to surrounding neighborhoods.

Prior to construction, ODOT will share a noise hotline number to reach a live person 24-hours a day to help resolve any noise problems or incidents.

IMPACT ON LOCAL ROADS

During construction, local roads, sidewalks and some parking spots may also close due to work overhead.

Detour signs will direct drivers to alternative routes. Pedestrian and bicycle detour signs will also be posted. Sidewalk detours will be accessible to people with disabilities.
