**CONSTRUCTION COMING**

**KNOW BEFORE YOU GO**  
Construction updates will be available on [TripCheck](http://TripCheck.com) beginning in late Spring 2018

## Summer highway construction begins Tuesday, May 29

**Know before you go** as overnight construction on [Beltline Highway](#) between Roosevelt Boulevard and Coburg Road begins Tuesday night. Work zone locations will be updated daily on [TripCheck.com](http://TripCheck.com) with the latest information so you know what to expect on your travels. Most work will be done at night and all schedules may change due to weather.

**Tuesday, work will begin on the eastbound lanes of Barger Road bridge.** The onramp from Barger Road to eastbound Beltline will be closed overnight Tuesday, 9 p.m. to 5 a.m., for the safety of work crews and travelers. Follow detour signs, expect lane closures, and slow down for work crews.

**For the first three weeks of the project,** crews will be removing pavement from bridges, replacing protective coatings on the bridges, and repaving. They will move east to west through five bridges, then west to east working on six.

Paving of the entire roadway will happen later in the summer.

We have a lot more work coming. This summer:

**[OR 126 Veneta to Eugene Highway paving and safety improvements project](#)** is scheduled to begin in July. Work will be done at night. The project will include paving between Cornerstone Drive in Veneta and Terry Street in Eugene. A right turn lane will be added at Ellmaker Road, along with two bus pullouts. Centerline rumble strips will be added to the roadway. Shoulder rumble strips will be added where appropriate based on the width of the road shoulder and distance to businesses.

**[Interstate 105 \(Washington/Jefferson Street Bridge\) bridge repair project](#)** will bring four I-105 bridges and ramps between Delta Highway and downtown Eugene up to current standards. The bridges were built in the late 1960s and early 1970s and need repair and upgrades. Work will include upgraded guardrails, deck paving, seismic retrofits, joint replacements, and other repairs. The project is scheduled to begin in late summer. Work will occur day and night. Lane closures and detours will be limited as much as possible, but will be necessary.

We have been working closely with the City of Eugene, Lane County, Lane Transit District, and other partners to coordinate area construction projects and minimize your inconvenience. Each agency will list its projects on [TripCheck.com](http://TripCheck.com). Access for pedestrians, including those with disabilities, and cyclists is available and identified through or around work zones.

Please check routes before you go and expect delays and detours in work zones. You may travel through several work zones. You may need to adjust your route, your time, or try a new way of getting where you are going. Updates on construction will be sent to the mailing list on a regular basis as work continues through the summer.

We appreciate your patience! We promise to get in, get done and get out as quickly as we safely can. The end result will be a safer and more reliable transportation system that connects people and helps Oregon's communities and economy thrive.
