

OR99E: SE Harold Street to SE Harrison Street PAVING PROJECT

Weekend closures of OR 99E northbound scheduled

The contractor for the OR 99E Paving Project has announced the dates for the weekend closures of OR 99E northbound. These closures are required for the contractor to remove the bridge over Crystal Springs and replace it with a culvert. Four weekend closures are expected. During the weekend closures, there will be the following impacts:

- ◇ OR 99E northbound will be completely closed from Tacoma Street to Harold Street. No traffic will be permitted north of Tacoma Street. Road users will be able to rejoin OR 99E northbound at Harold Street
- ◇ Closure times are 10 p.m. Friday night to 5 a.m. Monday morning
- ◇ A signed detour will take northbound traffic on OR 224 eastbound to I-205 northbound (see detour map on the back)
- ◇ There will be several periods throughout the summer when drivers will not be permitted to turn right from SE Tolman Street and/or SE Bybee Street onto OR 99E southbound
- ◇ Traffic on OR 99E southbound will remain open

The closures are planned for the following weekends from 10 p.m. Friday to 5 a.m. Monday. The schedule is subject to change due to weather, site and equipment conditions:

- ◇ July 7 - 10
- ◇ July 21 - 24
- ◇ August 4 - 7
- ◇ August 18 - 21

In addition to the full weekend closures, there will be several weekends of lane closures in both directions with traffic shifted into various configurations. These lane closures will be from 10 p.m. Friday to 5 a.m. Monday. Drivers should be aware of traffic shifting and limited travel lanes during these weekends:

- ◇ July 14 - 17
- ◇ July 28 - 31
- ◇ August 11 - 14

On weekdays, there will be nighttime lane closures after 7 p.m. Drivers, people on bikes and on transit should expect that this area of OR 99E will have congestion, detours and delays in July and August, especially on the weekends. Please allow extra time when traveling through this area. In addition:

- ◇ **BIKE RIDERS:** The shoulders of OR 99E are closed throughout construction and a fully-signed bike detour is in place
- ◇ **TRANSIT USERS:** The #19 bus stop on SE 23rd Avenue at Westmoreland's Union Manor will remain open, although there will be temporary route changes to accommodate the construction
- ◇ **NOISE:** Residences and businesses adjacent to the project may experience daytime and nighttime construction noise. ODOT will mitigate noise impacts by restricting high noise activities in residential areas to no later than 10 p.m. In order to ensure worker safety, back-up alarms will be used during construction, including work at night. For nighttime noise questions or concerns, call the 24-hour noise hotline at 503-412-2327

Stay current with the project

- ◇ Visit the project website - www.99Epaving.org - to find current information, including detailed traffic impacts, in a weekly construction update posted every Friday.
- ◇ Visit www.tripcheck.com or call 511 for current traffic conditions and impacts
- ◇ Call the noise hotline (24-hour number to be used for noise concerns): 503-412-2327
- ◇ Ask questions or get added to the project email list by contacting ODOT Community Affairs directly: Lili Boicourt, PH: 503-731-8247 or email: Lili.D.Boicourt@odot.state.or.us

OR99E: SE Harold Street to SE Harrison Street PAVING PROJECT

There will be up to four weekend northbound closures of OR 99E in summer 2017.

About the project

ODOT is paving and striping 2.6 miles of OR 99E (SE McLoughlin Boulevard) in SE Portland and Milwaukie. In addition, the Crystal Springs Bridge will be replaced with a box culvert and several sections of highway will be fully reconstructed. Construction is expected to be complete by the end of 2017. Visit the project website for more project information at www.99Epaving.org.
