<td>Basin Transit Service Transportation District</td>
<td>Basin Transit Service Inter City Transit Service</td>
<td>The Klamath Tribes - Fund Basin Transit Service TD - Fund</td>
<td>The Klamath Tribes - This will serve many low income riders and help make Basin Transit Service better. It will help connect small unserved community to the Urban Growth Boundary. This is the #1 Prioritized List Rank.</td>
<td>SCOACT - Fund</td>
<td>SCOACT - This project would satisfy a large demand for transportation services to the outlying communities to be able to access services such as food, medical, and clothing. A recent food assessment in the area showed that one of the needs in the area is transportation. The improvements proposed would be a very positive step to improve rural connectivity in the area. This is needed service for the underserved and Native-American communities living in a large County with limited transportation options. This expansion would also bolster transportation options for tourism which is large economic generator in the area</td>

<tr>
<td>135514</td>
<td>Benton County</td>
<td>Coast to Valley Expansion - Benton County</td>
<td>Benton County - Fund Lincoln County - Fund Linn County - Don't Fund</td>
<td>Linn County - Linn County recommends this project not be funded. Benton County Coast-to-Valley service has a very low historic ridership (between 2.7 and 3.7 riders per 50 mile trip leg). There is no specific evidence provided in the application to support the need to double the service. If ridership is doubled with a doubling of service (which is doubtful) the STIF operational cost per ride would be $30-35. The reference to replacing L-B Loop service on US20 is simply not supported by L-B Loop’s operational facts (30 years of experience) and is not supported by the recently-approved L-B Loop Service Development Plan. Linn County considers this to be a poor investment of $379,660 of STIF funds.</td>
<td>CWACT - Fund</td>
<td>CWACT - Hopeful increase in ridership from increased frequency. Connecting coast to college campuses and regional medical services in the valley. Increase in transportation options creates an increase in employment options for workers across the region.</td>

<tr>
<td>134756</td>
<td>Grant County TD</td>
<td>John Day to Ontario Route</td>
<td>Grant County TD - Fund</td>
<td>Grant County TD - This will not provide an overlap of services in Ontario, but would provide a valuable connection between very remote areas and a larger community for shopping, medical and other travel connections.</td>
<td>SEACT - Fund</td>
<td>SEACT - Connecting rural and frontier eastern Oregon residents to cities with services sought by these residents is an essential need. The project will complement the already existing transportation services provided by the People Mover, but this will add an additional eastern route that currently does not exist. I support this project because it is filling a transportation gap in rural eastern Oregon by adding more routes that do not already exist. Connections with other service providers in route is highly consistent with recently adopted OPTP. It provides transportation for many rural area(sic) with low income. NEACT - This project closes a historical gap that is in need of service, and it connects with regional partners in a meaningful way. NEACT was asked to weigh in on a SEACT project because it serves communities and utilizes travel corridors in our jurisdiction. We echo SEACT’s support of this proposal and agree that connecting otherwise unserved communities in route to larger population centers is highly consistent with the vision and goals of the Oregon Public Transit Plan.</td>

<td>Grant County TD</td>
<td>Vehicle Hardware/Software</td>
<td>Grant County TD - Fund</td>
<td>Grant County TD - This project is a collaboration with the iTransitNW system which includes several transit providers, and would allow the District to bring technology to our system that would enhance the transit users experience.</td>
<td>SEACT - Fund</td>
<td>SEACT - As safety is the top priority the need for up to date technology is essential for public transportation. This project will bring the technology up to proper standards especially with the non-existent cell coverage areas. I support this project. Updated technology in transit vehicles is priority for better interagency and public communication, and passenger safety, especially when buses travel in such remote areas as rural Oregon. Additionally, there are 7 agencies in collaboration with this project, which proves to be a huge priority for funding. NEACT - This project would allow Grant County to connect to a regional platform of visibility and allow not only local trip planning, but trip planning all the way to Washington through a series of partners on iTransitNW. This is exactly the sort of innovation greatly needed in rural transportation areas to begin bridging the divide in service in rural versus urban areas that is historically limited by funding decisions. NEACT is considering the SEACT request because the proposed service network includes communities and corridors in our jurisdiction. We echo SEACT’s support and are happy to see broad collaboration that leverages the resources of our mutual and respective service providers.</td>
</tr>
<tr>
<td>135056</td>
<td>Grant County TD</td>
<td>Bus Shelter at High School</td>
<td>Grant County TD - Fund</td>
<td>Grant County TD - Project is being done in coordination with ODOT, Safe Routes To School and the City of John Day due to current sidewalk project being designed. Getting in on the design phase decreases expenses significantly.</td>
<td>SEACT - Fund</td>
<td>SEACT - Provides pedestrian safety, safe route for students; increasing access to grades 9-12 and general public to the public transit system. I fully support this project. It increases safety and is much needed. This project is also in line with existing sidewalk projects that ODOT and the City of John Day are currently working on. Safety related to schools should be the top priority of funding. This shelter provides safety for students as well as sending the message that being in school is important. The shelter will give the students confidence that they have reliable transportation to and from school. Proposed partnership with Safe Routes to Schools makes this project compelling.</td>

<tr>
<td>134684</td>
<td>Grant County TD</td>
<td>Expansion Vehicle</td>
<td>Grant County TD - Fund</td>
<td>Grant County TD - Currently the District has no back-up vehicles and expansion of service requires additional vehicles.</td>
<td>SEACT - Fund</td>
<td>SEACT - The People Mover continues to provide additional services and routes for the public, but they are doing this without expanding their fleet. If we truly believe in public transportation and safety then they need to have a reliable fleet of vehicles, and this includes a new vehicle. Vehicles are scheduled for routine maintenance as well as the occasional unexpected maintenance issue that takes a vehicle out of rotation. I support this project for a couple of reasons: 1) with all the added routes and expanded service, The People Mover needs a backup vehicle. Currently, if a vehicle breaks down, they are left without a reserve; 2) the new vehicle has increased capacity than their current passenger vans to take more people increases seat capacity, decreases wait time at stops and adds intercommunity connection of Vale and Ontario to the current inter community connection</td>
</tr>
<tr>
<td>134758</td>
<td>Grant County TD</td>
<td>Bus Station Expansion Phase 2</td>
<td>Grant County TD - Fund</td>
<td>Grant County TD - Other public agencies are contributing to this project - the City of John Day and Grant County Road Department are assisting with the demolition and excavation of the current structure to reduce costs significantly for this project.</td>
<td>SEACT - Fund</td>
<td>SEACT - The current bus station is not a long term solution. With the expansion of services and routes there is a high need for a bus station to adequately serve the People Mover, and this project will serve that need. I support this project because it positively affects low-income households that utilize the public transit system on a regular basis by providing improved access to park and ride spaces in Grant County. The new park and ride space will also increase passenger safety with the addition of video surveillance and lighting. Phase II of the project which when complete will improves access to public transportation by adding additional park-ride spaces for passengers utilizing the intercommunity and intercity connection. Provides stops at small communities along the way where many are not served by the public transportation service. Also provides a safe, secure place to park a single occupant vehicle and board public transit vehicle.</td>

<td>Intercity Weekly trips between Bend and Burns</td>
<td>Harney County - Fund Deschutes County - Fund</td>
<td>COACT - Fund SEACT - Fund</td>
<td>COACT - This is a very important service for that community, which has a low-income and aging population. It provides access to medical services, shopping, and other essential services for those riders. SEACT - Reasons for support (or lack thereof): The ability to support the current route will create additional services in the future for public transportation. Supports low income needs outside our community with special medical or other service opportunities not found in our community. St. Charles depends on this service when planning discharge for patients and endure comfortable travel home. They work together to get as many users on a trip as possible. Provides airport drop off and pick-up and improves passenger experience. I support this project because it is essential for the public to have access to travel to other communities for medical appointments, shopping, Grey Hound, or the airport. Any expansion or improvement in public transit routes are beneficial to the communities in eastern Oregon. Reasonable and (sic) request. To the extent this is a preservation of existing services I have concerns about its eligibility. Connections with other service providers in route is highly consistent with recently adopted OPTP.</td>

<td>Lane Council of Governments</td>
<td>Florence-Eugene Intercommunity Route</td>
<td>Lane Transit District - Fund</td>
<td>CTCLUSI - Fund</td>
<td>Lane ACT - Fund</td>
<td><strong>Lane ACT</strong> - This project will provide an important intercommunity connection between Florence and Eugene at an accessible price point. This connection also improves access to Eugene for coastal communities south of Florence. Providing transit opportunities and connections throughout all of Lane County is an important network component for achieving multiple community goals (ex. reduce congestion, provide equitable access, reduce emissions). In 2016 LaneACT began receiving consistent, compelling, and persistent public testimony asking for this service. Citizen proponents were and continue to be regular attendees at LaneACT meetings, providing formal testimony at over a dozen meetings. Testimony frequently called attention to the number of residents in Eugene with disabilities who have never been to the coast for lack of an accessible public/affordable transport option; and, how transit is an essential component to improving safety on a high crash corridor. Almost 40% of Florence’s population is 65 or older. 28% of Florence’s population has a disability compared to 13.3% of Eugene’s. The route will provide critical access to medical, social, and other services available in Eugene.</td>

<td>Lincoln County Transportation District</td>
<td>Coast To Valley Express Service Expansion</td>
<td>Benton County - Fund Lincoln County - Fund Linn County - Don't Fund</td>
<td>Linn County - Linn County works hard to support its regional partners but in this case Linn County recommends this project not be funded. The Lincoln County Coast-to-Valley service has a very low historic ridership (total ridership is somewhat higher than Benton County (among other reasons because of weekend ridership between Newport and Toledo). Linn County notes and appreciates the importance of medical-related trips to Corvallis. There is no specific evidence in the application to support two additional RT a day. A third trip per day would, potentially, be helpful to medical-related passengers. Linn County notes the importance of Corvallis-related medical and other services. Boardings and de-boardings in Albany is usually limited to one or two passengers. Lincoln County should consider deleting Corvallis to Albany service (BC C-to-V does not access Albany) and reprogram existing resources to add a third RT trip a day (with three RT between Newport and Corvallis). Transfers to Albany would be provided at the Corvallis Transit Station. The reference to replacing L-B Loop service on US20 is simply not supported by L-B Loop’s operational facts (30 years of experience) and is not supported by the recently-approved L-B Loop Service Development Plan.</td>
<td>CWACT - Fund</td>
<td>CWACT - Hopeful increase in ridership from increased frequency. Connecting coast to college campuses and regional medical services in the valley. Increase in transportation options creates an increase in employment options for workers across the region.</td>

</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>I support this project because Malheur County’s existing public transit fleet is in poor condition. I believe in investing in preventative maintenance to provide the public with a safe and reliable transit system. The current condition of fleet will make the success of this public transportation program vulnerable to continue reliable service. Preventative maintenance is the cornerstone of public transportation and as a result the vehicles must be able to support the services offered. This project was intended to be scalable. Malheur County puts a lot of miles on vehicles before they age out of fleet. Replacing with newer vehicles in a prioritized way is a critical need for the served communities. Please don't let the total price tag frighten you. The County has provided a comprehensive proposal of its needs. Replacement of any of the aging vehicles will be of significant help.</td>

<td>TriMet</td>
<td>TriMet Express/Limited Stop Bus Network Study</td>
<td>Trimet TD - Fund</td>
<td>Trimet TD - No prioritized rank given. All projects in the TriMet QE area are equally important.</td>
<td>Region 1 ACT - Fund</td>
<td>Region 1 ACT - This project is a Metro-region priority. This is something that was identified through the Regional Transportation Plan and the Regional Transit Strategy. This study would evaluate if there is a market for express/limited stop bus and could utilize potential ETC treatments such as bus on shoulder. All options need to be evaluated to improve efficiency, reliability to make public transportation be more competitive with driving. Using the shoulder in urban areas for transit in certain situations is a safer and more efficient use of highway right-of-way. Consider possible cost saving options. An implementation strategy should be included. This proposal responds to public demand for improved speed and reliability on public transit.</td>
</tr>
<tr>
<td>134336</td>
<td>TriMet</td>
<td>TriMet Transit Priority Spot Improvements</td>
<td>Trimet TD - Fund</td>
<td>Trimet TD - No prioritized rank given. All projects in the TriMet QE area are equally important.</td>
<td>Region 1 ACT - Fund</td>
<td>Region 1 ACT - This project is a Metro region priority. It builds off the ETC work being led by Metro and TriMet. This is a small amount of money that may develop 1-3 projects on the ground. It is easy to understand how they will use the funds. Prioritizing locations based on vulnerable populations is good. Consider possible cost saving options. If funded, the prioritization and implementation of projects be coordinated with Metro funded ETC program. TriMet buses are increasingly stuck in congestion making them slower, less reliable, and less competitive with driving. This project would continue the work the City of Portland helped to pilot looking at small, cost effective spot fixes that cumulatively can have a significant improve the speed and reliability of TriMet buses, making the service more useful to more people.</td>

<td>133510</td>
<td>Umatilla County</td>
<td>Multi-County Transit</td>
<td>Umatilla County - Fund Grant County TD - Fund</td>
<td>Grant County TD - This would allow Umatilla County residents increased access to public transportation. Umatilla County - STIF Advisory Committee recommends funding this project but did not prioritize Intercommunity Projects because they felt they were equally important.</td>
<td>SEACT - Fund NEACT - Fund</td>
<td>SEACT - I support this project because it is expanding routes that were previously not offered in the more rural areas of Umatilla County. Umatilla is also partnering with Grant County to provide weekly stops in those areas. Any expansion or improvement in public transit routes are beneficial to the communities in eastern Oregon. Reasonable request. The partnership stated will provide public transportation to another rural area of Oregon which is much needed. The ability to use public transportation has environmental and economic impacts that will only benefit the state, local communities and ultimately citizens. NEACT - This project refrains from re-inventing the wheel by utilizing an existing service, but directly impacts low income households in a positive way by removing any financial burden on the passenger. NEACT echos and supports SEACT's support of this shared project. I think this application speaks for itself. Kayak and Grant County Transportation District enjoy a historic coordination effort that makes sense in the served communities. The Mission to Walla Walla connection is not a service duplication, it's a practical redundancy that varying passenger schedules require that is beyond the capabilities of any one provider.</td>
</tr>
<tr>
<td>133125</td>
<td>Union County</td>
<td>Capital Purchases</td>
<td>Union County - Fund</td>
<td>NEACT - Fund</td>
<td>NEACT - Similarly to the Grant County project it addresses trip planning and customer friendly route accessibility in a meaningful way. These project and its fixed network support active transportation. Passenger facing real time vehicle location is a critical link for park-n-ride, cyclists and first mile/last mile connections.</td>

<td>Washington County</td>
<td>Community Transit and Demand Response System Technology Capital Improvements</td>
<td>Trimet TD - Fund</td>
<td>Trimet TD - No prioritized rank given. All projects in the TriMet QE area are equally important.</td>
<td>Region 1 - Fund</td>
<td>Region 1 ACT - This project is a Metro region priority. The project will address some of the first and last mile connections and provide a better passenger information and experience. Technology that can assist in better operations and management is key for transit agencies. The proposal includes training which will be critical for their staff to effectively use the technology.</td>
</tr>
<tr>
<td>135605</td>
<td>Wheeler County</td>
<td>STIF Discretionary</td>
<td>Wheeler County - Fund</td>
<td>Wheeler County - Wheeler County has a small, but effective rural demand response service through Wheeler County Community Transportation. This project will help sustain lifeline services for this highly rural area of Oregon. The STIF Grant forecasts expanding these much-needed services throughout the county to low-income residents. The STIF discretionary funds associated with this project will provide service enhancement, preservation of existing capacity for transportation to eligible individuals within Wheeler County, while preventing gaps in service. Wheeler County’s poverty rate is slightly higher than the state average, with 18% of the County living in poverty. The median household income in Wheeler County is about 69% of the median income in Oregon. We have a high demand for transportation services for this demographic. Wheeler County Community Transportation is the only public transportation service in Wheeler County. The program serves the entire area of Wheeler County. The promotion, enhancement and facilitation of access to these services is necessary. This project is important for improving health and livability outcomes for Wheeler County residents. The fund request for this project includes costs associated with supporting administration, management of driver recruitment, safety and background checks, training, scheduling of drivers, coordination with passengers, other support functions associated with volunteer drivers.</td>
<td>LIDACT - Fund</td>
<td>LIDACT - The LIDACT strongly supports this application, and feels that this project has significant benefit to the entire Lower John Day Area. The LIDACT has identified this as a top 4 priority application due to the value in expanding and improving services in Wheeler County. Wheeler County has an small but effective rural demand response service and this project will help sustain lifeline services for this highly rural area of Oregon. Although the application does not effectively share this message, the project support a vital linkage for vulnerable populations to get to medical care and services, would improve Wheeler County’s ability to coordinate with neighboring counties and conduct mobility management, and would link highly rural areas to urban centers. This project is important for improving health and livability outcomes for Wheeler County residents.</td>
