County Totals.....	alphabetical order

The Search and Rescue database was a project started in 1996. With the completion of the design, the database launched in 1997 and has been collecting SAR data ever since.

After 16 years of accumulated data, this report shows the total of all the SAR categories in the database. Some of the charts in this report are the same as that found in the Annual SAR Report. But whenever possible, if the data was reported in the Annual Report, it was left out of this one. The intent is not to duplicate the Annual Report's data, but to show it in different ways. The information is necessarily fluid, as the totals constantly change as new reports are entered into the database. Therefore the totals on two different charts may not add up.

Maps

Throughout this document are maps showing the location of the various types of missions and activities. Coordinates were collected starting in 2010. There are a few earlier missions with coordinates and these have been included.

Coordinates are the key to mapping data. Any mission with no coordinates or unusable coordinates will not appear on any map. If both the Initial Planning Point (IPP) and the Find coordinates were provided, the map will show the Find coordinate. If only one set of coordinates was provided, then that gets plotted whether it is the IPP or the Find location.

Here is a description of each graph, chart, or table found in this report.

Transportation Use and Work Hours from 97-13, page 9

This is the total of every entry in the database. Included are all hours, miles, and dollars for every work and transportation category. Included with the 15,806 entries are "partial entries," which are missions with data missing.

Mission by Type and County (Including assists), page 10

Every mission type is listed as a column heading. This shows the number of missions each county has accumulated since 1997. Assists to other counties *are* included on this chart.

Operational Missions per County, page 11

Operational missions refers to missions that do not include training and civic events. The remaining missions come much closer to the general understanding of what comprises search and rescue. Assisting counties are *not* included on this chart. So the numbers shown are the actual number of missions in each county.

Paid Work Hours, page 12

These are the total paid working hours as reported by each county.

Volunteer Work Hours, page 13

These are the total volunteer working hours as reported by each county.

Missions per Month, page 14

Missions and Operational missions are graphed by month. Assists to other counties are *not* included on either line.

Number of Missions by Type, page 15

These totals do *not* include assists to other counties. Also multiple missions i.e., mission consisting two types, are not included. This is the total number of each type of mission with an accompanying graph.

Transportation and Work, pages 16 to 22

The next 7 pages show the total amount of work and transportation used by each county for every type of mission. Assists to other counties *are* included. These pages accumulate the data for 15,565 missions.

Searches and Rescues (Land), page 23.**Searches and Rescues (Water)**, page 24.

These two graphs show the total number of missions for searches and rescues on land and water. Assists to other counties are *not* included.

Rescues page 25.

This map plots the location of every Rescue mission for which there are coordinates. Generally, these would cover events occurring since 2010. The map shows 658 land rescues and 342 water rescues.

Searches page 26.

All searches divided by color for land and water missions since 2010. The map shows 1,228 land searches and 111 water searches.

Search Results (Mt Hood Region) page 27.

Many missions occur in the region around Mt Hood. This map shows several results for missing people. The arrows show the direction of travel. The base of the arrow is the IPP and the arrowhead is the Find location. The length of the arrow is the straight line distance traveled by the subject(s). At the base of the arrow is a triangle showing how long it took to locate the subject. At the arrowhead is a circle showing whether the subject was found alive or deceased.

- A missing triangle means time data was not provided.
- If there is no arrow, then either the IPP of the Find coordinates were not provided.

Bodies Found page 28.

One type of mission is the finding of a body by civilians not involved in a mission. This is a map of where all 45 bodies were found either on land or in water. The map shows only about half the state as there were no coordinates provided for bodies found in the eastern half of the state.

Recoveries page 29.

This is a map of the results of every SAR mission showing all 2,107 subjects recovered alive, 250 recovered deceased, and 53 who are still missing. Even though the map refers to “recoveries,” those people still missing are included. False missions, i.e., missions where the subject was never in distress, are not included.

Recoveries (Deschutes detail) page 30.

This map uses the same criteria as the previous map and shows a detail encompassing the majority of Deschutes County.

Recoveries (Columbia Gorge) page 31.

A close up of the Columbia Gorge and the recoveries for the region.

Injuries page 32.

This is a map showing the location of the 333 injured subjects and the 1,626 uninjured subjects. This includes only subjects that were found alive when recovered.

Injuries (Mt Hood region) page 33.

These are the injuries in the Mt Hood region. In this case, both living and deceased subject are included.

Number of Activities by Type, page 34.

These are the activities tracked in the SAR form. Assists to other counties are *not* included.

Activities by County, pages 33 to 46.

The next 11 pages show the total amount of work and transportation used by each county for every type of subject activity. Assists to other counties *are* included. These pages accumulate the data from 10,377 missions. Keep in mind that these are missions, not number of subjects involved.

The following set of maps show the mission location for some activities.

Water Missions page 47.

Water missions include searches and rescues for subjects swimming, boating (powered and non-powered,) SCUBA, and any other water activity identified on the SAR reports. The map depicts 345 missions where the subjects were recovered alive, 88 deceased and 18 are still missing.

Water Missions (Portland region) page 48.

This detail shows the numerous missions in Portland and the region surrounding it.

Water Missions (Eugene - Springfield) page 49.

This detail shows the numerous missions in the Eugene - Springfield region.

Wanderers page 50.

Wanderers are defined as those traveling without a destination. The people we see most often in this category are small children and anyone with some type of mental illness. Not surprisingly, the map shows concentrations in populated areas and the coast. The map shows 204 recovered alive, 7 were recovered deceased, and 9 are still missing.

Suicide page 51.

This is a map of all attempts at suicide. The map shows 20 were recovered alive, 53 were recovered deceased, and 12 are still missing.

Suicide (Portland detail) page 52.

Looking at this section of Portland, the Fremont Bridge shows a concentration of suicide victims.

Snowmobile Missions page 53.

This map shows people lost or injured while riding snowmobiles. There are 47 missions depicted on the map.

Snow Sports Missions page 54.

Snow sports include snowboarding, all types of skiing, and any other snow-related activities *except* snowmobiling, which has its own map. There are 117 missions depicted on the map.

Snow Sports Missions (Mt Bachelor region) page 55.

The area around Mt Bachelor has a high concentration of people involved in various snow sports. This map shows the location of each mission. Snowmobiling *is* included on this map.

Mushroom Picking page 56.

Mushroom picking is a popular outdoor activity. This is a map of all missions involving mushroom pickers. The map shows 86 were recovered alive, 2 were recovered deceased, and 1 is still missing.

Motor Vehicles page 57.

Searches and rescues for people in their vehicles is one of the most common missions in Oregon. There were 482 recovered alive and 15 were deceased.

Hunting page 58.

This map shows all missions involving both game and bird hunters. The map shows 91 recovered alive, 2 recovered deceased, and 2 still missing.

Climbing page 59.

Although a news media favorite, there are relatively few missions for lost or injured climbers. It is not surprising that the missions concentrate on Mt Hood. The three

Sisters, Mt McLoughlin, and Smith Rocks. The map displays 66 recovered alive and 6 deceased.

Hiking page 60.

Hiking is the single most popular outdoor activity in Oregon. From the map we can see that many of the areas popular with climbers are also popular with hikers. The map displays 418 recovered alive, 15 recovered deceased, and 11 are still missing

Fishing page 61.

This is a map of the locations where missions occurred involving people fishing. The map shows 33 recovered alive, 15 recovered deceased, and 1 is still missing.

Subjects by Age (SAR Only), page 62.

Over 12,000 people have been reported as subjects assisted by SAR forces. This includes only people involved in searches and rescues. The actual number is a lot higher as many reports are not filed and some have no subject data entered. Approximately 90% are recovered alive and 8% are deceased.

Although not mapped, the following table shows the total number of subjects under the influence of some kind of drug use since we started collecting data in 2006. As you can see, alcohol accounts for 86% of all drug use in SAR subjects.

Drug Use		
Alcohol	235	86%
Meth	17	6%
Opiate	4	2%
Hallucinogen	9	3%
Marijuana	8	3%
Total	273	

Mental status was also added in 2006. Although many subjects suffer from more than one condition, the dominant problem was used for the table below. From the data, we can see that Alzheimer's and dementia account for nearly half the subjects. One fifth of the subjects suffer from some form of mental illness.

Mental Status		
State	Total	%
Alzheimer/Dementia	253	44%
Autism	48	8%
Mental Handicap	76	13%
Mental Illness	120	21%
Mood Disorder	66	12%
Other	12	2%
Total	575	100%

Subjects by Age (Searches Only), page 63.

These are the number of people only involved in searches. Almost 7,500 people have been reported lost, of which 88% were recovered alive, 8% were deceased, and 3% are still missing.

Among these subjects are some that were lost alone and other lost while with companions. From the chart below is it obvious that you are about 7 times more likely to die or go missing if you get lost by yourself.

Lost Subjects	Alive	Deceased	Missing	Unknown
In groups	3,582 (96.8%)	81 (2.2%)	28 (0.8%)	10 (0.3%)
Solo	3,015 (79.0%)	570 (14.9%)	206 (5.4%)	27 (0.7%)

Subjects by Age (Rescues Only), page 64.

By definition, rescues are for subjects in distress whose location is known (or approximately so). Of the 4,600+ subjects, almost 93% were recovered alive and 7% were deceased.

Assets Locating Subjects (Searches Only), page 65.

This applies to searches only since rescues, by definition, are subjects in a known location. While 27% of all subjects self-recover, ground SAR remains the single most effective method of locating a lost subject.

Land Use for All SAR Missions, page 66.

Ownership of the land for all searches and rescues. Since a subject can wander over land owned by many different agencies, only the starting location is used to determine land use.

SAR Subjects, page 67.

This is actual number of subjects, male and female, in 10-year age groups. These are only people involved in searches or rescues.

SAR Subjects, page 68.

This is actual number of subjects, male and female, in 5-year age groups. These are only people involved in searches or rescues.

Total Work Hours (Land Searches Only), page 69.

This is a graph (on a log-log scale) of the total work hours spent on missions for missing people on land. It shows the hours spend searching for all 151 missions with people still missing, 379 missions with the subject found deceased, and 4,127 missions where they were found alive.

Total Work Hours (SAR only), page 70.

This graph compares the total work hours performed for all searches versus all rescues. This includes both land and water missions. The graphs display 3,010 rescue missions and 5,237 search missions. It can be seen from the chart that only 3 rescue missions ever surpassed 1,000 hours of work, while there are over 100 search missions (2%)

surpassing 1,000 hours. Four search missions even surpassed 10,000 hours of work. Overall, searches used 5.7 times more work hours than rescues.

On the other end of the spectrum, there were 1,546 search missions (30%) that accumulated 10 hours of work or less. For rescues, 1,898 missions (63%) accumulated 10 hours or less.

The following sets of tables show how many hours were used to complete a mission. For search missions, 75% of the missions accumulated 87 hours or less. Compare that with rescues which accumulated only 38 hours or less to finish 75% of the missions.

All SAR Missions	
Percent of missions	Work Hours
25%	≤ 8 work hrs
50%	≤ 22 work hrs
75%	≤ 64 work hrs

All Search Missions	
Percent of missions	Work Hours
25%	≤ 8 work hrs
50%	≤ 27 work hrs
75%	≤ 87 work hrs

All Rescue Missions	
Percent of missions	Work Hours
25%	≤ 6 work hrs
50%	≤ 16 work hrs
75%	≤ 38 work hrs

Time to Find a Deceased Subject (water), page 71.

This graph shows the number of days it took to find deceased subjects lost in a water environment. We can see that about 50% of the missions result in locating the subject in 1 day. After 10 days, 82% of the missions have located their subject. There are only 160 records for this situation.

Aviation, page 72.

The total of all aviation missions in the database.

Aviation Mishaps and Injures by Month, page 73

Total number of accidents and injuries in Oregon since 1997.

Beacons, page 74.

The total of all ELT and EPIRB activations missions in the database.

ELTs per Month by County, page 75.

This shows the number of ELTs signals by month for every county since 1997.

On Call Hours, page 76

The first column is a list of all the people who have been on-call for OEM since 1994. The second column shows the total number of on-call hours accumulated. The third is the number of missions they either ran or assisted, but only since 1997. The data from 1994-1996 is not available.

County Totals

These are the grand totals for all the data reported by the counties.

Transportation Use and Work Hours from 97-13
