

Feel an earthquake? Earthquakes & Tsunami

Oregon gets TWO kinds of tsunami:

LOCAL A local tsunami arrives in 10 to 20 minutes. Your only warning will be the ground shaking. If you are near the ocean, you will need to move quickly to high ground by foot. **Do not wait for an official warning!**

DISTANT A distant tsunami is caused by a large earthquake across the ocean. There will be time to evacuate, if necessary. Follow the instructions of local emergency responders and hotel staff.
