† Rates based on fewer than 12 events for the entire time period are considered unreliable.

* Rates based on a count < 5 or a denominator < 50 are not reported.

About the Data

Count Data Source: Oregon Death Certificate Data and Oregon Behavioral Risk Factor Surveillance System

Population Data Source: National Center for Health Statistics (NCHS), Estimates of the resident population of the United States by year, county, age, bridged race, Hispanic origin, and sex.

Data Notes: Data on deaths due to alcohol were calculated using the CDC Alcohol-Related Disease Impact (ARDI) methodology. This methodology calculates an estimate of how many deaths from a specific list of causes can be directly or indirectly attributed to alcohol use.

Date: March 29, 2019
