Basic Residential: Belloni Boys Ranch and the Wineva Johnson Center for Girls serve youth in separate, gender-specific facilities. Referrals are accepted statewide.

The program provides residential treatment in a structured environment and assists youth in developing coping skills, achieving a greater sense of competency and responsibility, and improving self-esteem. The program provides structure, support, and guidance to help youth internalize appropriate behavior.

Services include drug and alcohol education, male sex offender treatment, on-site alternative school, as well as individual, group and family counseling. Vocational services are also provided.

Referrals should include Reformation Plan, ERASOR, OYA RNA, recent psychological evaluation (within last 12 months), court orders, juvenile records, social and family histories, and conditions of parole/probation.

Youth accepted into this program must meet BRS requirements and will require BRS authorization prior to placement.

*Shelter level of service available at both locations.

Services

**BRS Proctor Care - Compass:** This program is a proctor model with a focus on transition and provides BRS Basic Services to a variety of treatment populations including youth with substance abusing behaviors, mental health issues and some gang involvement. Compass accepts youth transitioning into the community from YCFs, other residential placements, or those needing placement with an increased level of supervision and support. This program is designed to help youth successfully transition back into the community, via either living independently or reunification with a family member. Services provided to all youth include: BRS documentation, individual, family and group counseling, educational support, vocational support, and skill building curriculum.

Service plans are tailored to meet individual needs. However, the primary treatment focus will be on relapse prevention, offense specific aftercare and independent living skill acquisition.

Youth accepted into this program must meet BRS requirements and will require BRS authorization prior to placement. Referrals should include Comprehensive Case Plan, OYA RNA, previous treatment history and recommendation and, if available, please include social and family history, and recent psychological evaluation. Statewide referrals are accepted.

Services

**BRS Proctor Care – Independent Girls Options (IGO):** This residential proctor model program accepts youth transitioning into the community from Oak Creek, other residential placements, or those needing placement with an increased level of supervision and support. This program is designed to help youth successfully transition back into the community, via either living independently or reunification with a family member. Services provided to all youth include: BRS documentation, individual, family and group counseling, educational support, vocational support, and skill building curriculum.

Services for medication management are obtained through community resources and monitored by CCPC staff. Services for drug and alcohol are accessed through community providers.

Youth accepted into this program must meet BRS requirements and will require BRS authorization prior to placement. Referrals should include comprehensive Case Plan, OYA RNA, previous treatment history and recommendation and, if available, please include social and family history, and recent psychological evaluation. Statewide referrals are accepted.

Services

**BRS Probation Revocation Diversion – Project 180:** This is a short-term, 7-90-day program for youth that are on probation in community placement who are at risk of revocation. PROJECT 180 acts as a diversion program to stabilize the youth so they can return to their residential/community placement rather than being committed to a youth correctional facility. The program aims to enhance youth’s motivation for success in a community placement.

## Services

The Continuum – Intensive Behavioral Support program provides skills training and intensive behavioral support to youth who have difficulty re-regulating their emotions due to the presence of complex developmental trauma or other mental health concerns. NEXUS is the backbone of this program, providing a core curriculum that is woven throughout treatment. NEXUS is a compilation of several evidenced based therapeutic modalities including DBT, TF:CBT, and Motivational Interviewing.

## Program Specifics

Services

**Basic Residential & Independent Living Programs:** The program provides independent living services to males age 16 and older. Youth must be on parole or probation and be assessed as a moderate to high risk (using the OYA RNA). Services include preparation for independent living, work experience, vocational and job skills training, sex offender after-care monitoring, GED/Diploma completion and individual counseling, skill-streaming and support. On-site (contracted) drug and alcohol counseling services are provided. Program focuses on teaching skills to help youth succeed independently upon graduation from the program.

Adjudicated sex offenders must have successfully completed a treatment program to be eligible for referral. Youth with a history of fire setting may not be accepted. Youth accepted into this program must meet BRS requirements and will require BRS authorization prior to placement. Referral must include OYA RNA, ERASOR, Case Plan, previous treatment history, mental health evaluation and recommendations, court orders and police reports.

**Services**

**Basic Residential & Proctor Enhanced Services:** This program serves youth 12 to 17 years of age in a structured group living facility or in proctor homes. A consulting Clinical Psychologist conducts a psychological assessment. Medication Management is available on-site via the local mental health provider. Individual service plans are developed for each youth, with treatment directed by supervisors with advanced degrees. The program serves at-risk youth or youth on probation or parole. Services include drug and alcohol assessment and education and individual, group and family counseling.

Youth attend an on-site public school and can progress toward a high school diploma. A variety of evaluative and assessment methods are available, including psychological assessments from a clinical psychologist.

Referrals should include Reformation or Case Plan, OYA RNA, ERASOR (if appropriate) social and family history, psychological evaluation, if available, and previous treatment history and recommendations.

Chronic fire setters, youth with an IQ below 70, highly assaultive youth or chronic runaways are not appropriate for referral.

Youth accepted into this program must meet BRS requirements and will require BRS authorization prior to placement.

Services

Basic Residential - Cordero House: This program serves adolescent males ages 14 to 19 who are in need of sexual offender treatment. In addition, the program has experience serving youth with executive functioning challenges such as Asperger’s, complications from brain trauma or fetal alcohol or methamphetamine addiction. The program provides a high level of supervision and structure in a community-based setting. BRS services are planned and supervised by Mental Health Therapists based on each youth assessed needs and mental health diagnosis. Psychiatric assessment and medication orders are completed by the program psychiatrist. BRS services include weekly individual, group and family skill building and counseling sessions. Family involvement is strongly encouraged through participation in family counseling, skill building sessions, monthly multifamily groups and weekly visits.

Youth attend an on-campus school which is a certified high school program through Tigard-Tualatin School District. Youth also have the opportunities for on line college courses, GED preparation and participation at Tigard High School.

Referrals - Youth accepted into Cordero must have a BRS approval, be appropriate for a community placement and have a history that would benefit from the services provided at Cordero. Legal adjudication for a sexual offense is not required but sexual offense treatment must be court ordered. Referrals should include:

- BRS Authorization
- OYA Case Plan or County Reformation Plan
- OYA RNA
- Current ERASOR and Any Other Assessments
- Previous Treatment History and Recommendation (Discharge Summaries and Incident Reports)
- Polygraph Results
- Psychological Evaluations
- Educational Records
- Police Reports
- Medical/Medication History

Services

**Basic Residential:** J Bar J is a residential treatment program serving males ages 13 to 19. Located on a 40-acre Central Oregon ranch, J Bar J is a denoted “Best Practices” Program which has utilized evidence-based practices for over 20 years. The ABCR (Accountability Based Cognitive Restructuring) Program teaches that freedom and responsibility go hand and hand.

J Bar J helps students understand the origins of their self-defeating behaviors and provides mechanisms and structure to successfully address mistaken beliefs.

Youth accepted into this program must meet BRS requirements and will require BRS authorization prior to placement. Referrals should include Reformation Plan, OYA RNA, ERASOR, complete juvenile offense histories, school status, social/family history, previous placement summary, and arrest reports for sex offenses. Psychological evaluation is not required but should be included if available.

**Services**

**Independent Living Program – The Apartment:** The Apartment Independent Living Program serves young men between the ages of 17.5 and 23 in the custody of the Oregon Youth Authority. Apartment residents receive training on independent living skills such as: budgeting, shopping, meal preparation, cleanliness, and time management. With support from program staff, youth have the opportunity to demonstrate application of treatment, develop professional and vocational skills by obtaining employment, save money for transition, and continue their education. Apartment residents earn privileges by demonstrating responsibility as they begin the process of community reintegration.

Relapse prevention and aftercare services are provided for: substance abuse, sexually harming behaviors, and cognitive distortions that contribute to criminal behaviors. Upon graduating from the program, Apartment residents will have obtained reliable employment, saved enough money to secure housing, and have learned the life skills necessary for navigating adulthood.

BRS Independent Living Program: Youth accepted into this program must meet BRS requirements and will require BRS authorization prior to placement. Any youth taking prescription medication will also be required to present with one month of bubble packaged medications. Referrals should include Reformation Plan, OYA RNA, ERASOR (if applicable), complete youth history, school status, social/family history, previous placement summary and arrest reports.

Psychological evaluations are not required but should be available. The LOFT is an independent living program serving males and females 17 to 21 years of age. The LOFT is a structured, life skills modeling environment that employs evidence-based approaches such as Positive Youth Development, Trauma Informed Care and Harm Reduction. Each youth completes Ansell-Casey Independent Life Skills Assessment, SASSI, RASSI and Beck’s Depression Inventory to help operationalize the service plan for the development of strong life, intrapersonal and interpersonal skills. The primary goals of the independent living program are educational completion, vocational training and life skills development.

Services are divided into two phases: Phase 1 – “Planning and Practicing for Independence” is approximately four months. In a supervised residential setting youth attend to educational/vocational goals, engage in Cascade Youth and Family Center’s employment pathways program (Project CLOUD), attend mandatory AOD in-house meetings twice a week, become oriented to the community through volunteer service, learn budgeting by grocery shopping weekly and investing 75% of all earned income, and practice newly learned skills to pave the way to self-sufficiency. Phase 2 – “Transition to Independence,” is flexible in terms of time. This phase supports the youth transitioning into their own independent residence while budgeting/paying for their own expenses. The LOFT will continue to provide case management, skill development and other supports as needed during this phase.

**Services**

**Intensive Residential:** Looking Glass Pathways Girls Program is both a short-term stabilization and treatment readiness program and a long-term treatment program serving an ADP of adjudicated 8 female youth. The program provides Intensive Residential Services for females with mental health and/or substance abuse treatment needs. Co-occurring disorders are accepted. Acceptance criteria will be based on female youth who exhibit the following characteristics: A primary Axis I mental health diagnosis and AOD abuse or dependency issues; or A primary AOD diagnosis, based on ASAM criteria and co-occurring mental health conditions or disorders. Co-occurring disorders are not necessary for admission but are welcome admissions. Additional characteristics that these female youth offenders may exhibit include: History of sexual and/or physical abuse; multiple felonies, including sexual and some fire setting offenses; and History of Behavioral Dyscontrol, e.g., running way problems in school.

**Program Specifics**

| PROGRAM: BRS Intensive Residential with additional AOD and/or MH services |
|---|---|
| Gender of Client: | Female |
| Age Range: | 14-18 (older considered w/exception) |
| Program Elements: | • Mental Health Assessment/Treatment  
• Alcohol and other Drug Assessment/Treatment  
• Psychiatric Consultation  
• Individual, Group and Family Therapy  
• Dialectical Behavioral Therapy  
• Independent Living Skills  
• On-site Education Vocational Opportunities  
• Recreation  
• Community Service/Restitution |
| Special Attributes: | Gender Specific Program for Females  
Youth may have mental health and/or alcohol and other drug disorders  
Will accept Assaultive, Suicidal and Depressed Youth |
| Sexually Harming Behaviors: | Considered on Case by Case Basis |
| Not Appropriate: | Youth with serious fire setting and/or serious assaultive behaviors may not be admitted. Current group dynamic will be taken into consideration when making this decision.  
Youth with very low IQ may not be appropriate. Depending on score, considerations will be discussed pertaining to the potential youth being vulnerable to victimization before deciding. |

Services

**Basic Residential**: Stepping Stone Program is a residential treatment program serving males ages 12 to 17. For youth who have committed sexual offenses, the age limit is 14 to 17. Treatment services include the following: individual, group and family counseling, individual and group skills training, sex offender treatment, on-site school, outpatient A/D treatment, referral for job skills training and job placement, independent living skills training, and psychiatric consultation. Family involvement is expected in the development and implementation of an individualized service plan for the youth and for on-going family counseling. Assaultive, suicidal and depressed youth are considered for admission.

Youth accepted into this program must meet BRS requirements and will require BRS authorization prior to placement. Referral must include Case Plan, OYA RNA, ERASOR, social and family history, court order with conditions of probation, discharge summary from any previous residential treatment. Youth should be age 17 or younger at the time of referral but may stay in the program after age 18.

Services

BRS Proctor Enhanced Services: Breakthrough is an evidence-based program with a continuum of care for providing substance abuse services for youth ages 13 to 18. Breakthrough provides services utilizing a day treatment format combined with a proctor care model. Youth attend school on-site and receive individual, family and group counseling to work through addiction and behavior issues. The program is comprehensive and intensive, lasting from six to nine months and is designed to help youth successfully return to their families or to transition to an independent living program. Breakthrough helps youth work through existing trauma issues, successfully overcome their addictions, and develop appropriate social and life skills.

Youth accepted into this program must meet BRS requirements and will require BRS authorization.

Prior to placement: Referrals should include Case Plan, OYA RNA, previous treatment history and recommendation, social and family history, parole/probation rules, police reports and recent psychological evaluation.

Services

Proctor Enhanced Services: Counterpoint Day Treatment (CPDT) is an evidence-based program with a continuum of care for providing sexual offending treatment for youth ages 13 to 18. CPDT provides services utilizing a day treatment format combined with a proctor care model. Youth attend school on-site and receive individual, family and group counseling to work through sexual offending issues and behavior issues. The program is comprehensive and intensive, lasting an average of 18 months. It is designed to help youth successfully return to their families or to transition to an independent living program. Along with working on their offending issues, CPDT helps youth work through trauma issues, develop appropriate social and life skills, and provides treatment for AOD issues.

Youth accepted into this program must meet BRS requirements and will require BRS authorization. Prior to placement: Referrals should include Case Plan, OYA RNA, previous treatment history and recommendation, police reports, probation/parole agreements, social and family history, and recent psychological evaluation.

Services

Mission Statement: Opening doors to new possibilities by strengthening children and families and improving communities.

The Next Door Treatment Services: provide quality care, treatment and education by means of a well trained professional staff that embraces the core values and incorporates the best evidence based practices in meeting the needs of youth offenders and their families.

The goal is that youth will be encouraged and motivated to reach their highest level of ability, success and independence and return to the community. To guide and direct the implementation of this mission and the treatment process five core values have been incorporated into every aspect of the programs: Safety, Respect, Responsibility/Accountability, Competency/Skill Development and Helpfulness.

BRS Proctor Enhanced Services and Alternative School - Klahre House: A residential treatment program offering day treatment and educational services in a proctor setting. Individual, group and family treatment and skill building are provided by qualified professional staff and Proctor Parents. The program provides a highly structured, therapeutic environment that emphasizes individual treatment planning, experiential growth, academic progress and behavior change as well as support for the families of the youth in care.

Assessment and Service Planning: All youth are assessed to determine; medical, education, behavioral treatment, mental health, family, spiritual, cultural and social needs at the time of intake. The youth, his/her family and the appropriate treatment partners, agency representatives and significant persons who will take part in treatment are invited and encouraged to participate in the development of a holistic service plan within 45 days of intake. The Master Service Plan will establish goals based on the assessment and input from the members of the team and reviewed every 90 days by the team with progress being noted and changes made as necessary.

Education: An on-site fully accredited alternative school provides educational opportunities that may lead to a high school diploma or a GED. Youth may also attend public school or the community college. Youth at the Klahre House attend structured classes where they obtain credit in Math, Science, History, Language Arts, Reading, Physical Education, Social Studies, Art, Computer Resources and other electives. Youth are provided an opportunity to work at their own pace and level of ability while being encouraged to be successful.

Day Treatment: A variety of treatment groups and individual counseling and skill building activities are provided based on identified criminogenic factors or issues that have resulted in the youth’s placement in this level of care. All treatment services are evidence-based practices that have been found to reduce recidivism. Issues of alcohol and substance abuse, sexually aggressive behaviors, and other socially challenging behaviors are addressed. Each child is also assessed for mental health issues and appropriate therapy and medication management provided. Most youth receive about 3 hours of counseling and skill building in the day treatment environment every day.

Sexually Aggressive Youth Treatment: Youth entering the program in needs of specialized sex offender treatment will undergo an initial evaluation which will include a risk assessment and a polygraph. All youth in the sex offender program will be assessed on a regular basis to insure their progression in treatment. The current treatment consists of individual, family and group counseling and treatment utilizing the best practices available. The average length of stay of youth in the sex offender program is currently about 14 months. Youth found to present to high a risk to the community will be referred to a higher level of care.

Mental Health: Each youth is assessed for mental health issues at intake. The onsite therapist, (Qualified Mental Health Professional) is available to complete a thorough mental health
assessment and provide outpatient individual, group and family therapy if determined necessary. Psychiatric care and medication management is provided by the contracted child psychiatrist MD. Youth who enter the program that have a current prescription for a psychiatric disorder, (DSM IV-R), will be seen by the doctor as soon as possible for psychiatric medication review. Youth who are not currently on medication may be referred based on the therapist’s recommendation.

**Proctor Homes:** Proctor Parents are highly trained and professional treatment providers who work collaboratively as an essential member of the treatment team providing services to program youth and their families. Proctor parents provide supervision, skill building, academic assistance, care and support that encourage the change process. The heart of the Klahre House Program is the proctor parents’ commitment and relationship to behavioral that change may be difficult given the youth’s past life situations. Proctor parents receive 40 hrs. of initial training prior to providing care for youth and participate in monthly trainings and support meetings lead by the NDI Proctor Home certification and support staff.

BRS Youth accepted into the Klahre House program must meet BRS requirements and will require BRS authorization prior to placement. Referral materials should include appropriate OYA documentation including the JJIS generated plan, previous treatment history and recommendations, recent psychological or mental health evaluation if available, current medication, a court order along with the current parole/probation requirements. It is very important that youth also have an identified after care resource provided at the time if Intake.

**BRS Transition Klahre House:** This program provides BRS Basic Services in a proctor model with a focus on transition, to a variety of treatment populations including youth with sexual offense and substance abusing behaviors.

The primary treatment focus will be on relapse prevention, offense specific aftercare and independent living skill acquisition.

**Academics:** Whether interested in acquiring a GED, high school diploma, or vocational training, academic success is a priority at NWYD. As such, educational needs and/or progress are included within each youth’s Individual Treatment Plan. All youth will have the opportunity to attend schools within the Bend-La Pine School District. NWYD staff will work with the districts “Special Programs” personnel to ensure each youth’s educational needs are met to include arranging for academic tutoring, at home academic time, Individualized Education Program (IEP) support, and on-line instruction. Additional academic/vocational support will be arranged through Central Oregon Community College, Oregon State University-Cascades, Heart of Oregon Corps, and Work Source Oregon.

**Basic Residential:** Northwest Youth Discovery provides Behavior Rehabilitation Services (BRS) by utilizing evidence-based approaches to target those psychosocial, emotional, and behavioral issues that have impeded our clients from achieving their full potential. Our high staff-to-youth ratio enables us to meet success at providing physical, emotional, and psychological support while remediating our risk factors. NWYD’s services include but are not limited to case management, treatment planning, goal development, aftercare services, individual and group counseling, psycho-education, therapeutic work experience, crisis support, therapeutic recreation, educational support, culinary experience, cultural/spiritual involvement, milieu therapy, and independent living skills. NWYD utilizes interventions and strategies from evidence-based models such as Motivational Interviewing, Dialectical Behavior Therapy, Aggression Replacement Training, Mental Health First Aid, Positive Youth Development, Collaborative Problem Solving, and Therapeutic Crisis Intervention.

Services

**BRS Proctor Care MTFC:** The OCP Monitor Program is a Multidimensional Treatment Foster Care (MTFC) Program, which provides community-based treatment as an alternative to group care and institutionalization for youth ages 12 –18. The OCP Monitor Program focuses on youth who have a history of chronic law violations, multiple adjustment and behavioral/emotional difficulties, including family problems, poor peer relations, school failure, minimal school performance, low self-esteem and mental health concerns. Services provided focus on close supervision and monitoring of program youth, including daily collection of data to track youth progress toward treatment targets, monitoring of school performance and peer relationships, implementation of an individualized behavior management plan in the MTFC Foster Home, skills training, counseling, daily contact with MTFC parents, intensive transition services with aftercare resources, and mental health services as needed. MTFC Foster Parents are supervised and supported to provide youth with a supportive reinforcing placement where youth are encouraged to develop recreational and work skills, and positive interpersonal habits.

The Program is based on 20 years of research and was selected as one of 10 national Blueprint Programs by the Office of Juvenile Justice and Delinquency Prevention in 1998. The OCP Monitor program/MTFC model was featured in reports on Violence Prevention and Children’s Mental Health programs by the United States Surgeon General in 2001.

Youth accepted into this program must meet BRS requirements and will require BRS authorization prior to placement, in addition to a court order listing OCP as the placement, Conditions of Probation, 30-day supply of medication and a clothing voucher (or 1+ week of appropriate clothing). Referrals should include Reformation Plan, OYA RNA, previous treatment history and recommendation and, if available, social and family history, and recent psychological evaluation.

Services

**Basic Residential:** This residential treatment facility offers services to youth who would otherwise be placed in a Youth Correctional Facility. It is located in a rural setting south of Oregon City. Youth must have been removed from home and community by court action. Program services include sex offender treatment, individual, group and family counseling, social skill building, recreation, drug and alcohol counseling, employment counseling and job training. Youth have on-site alternative education. The structured group living program is directed to behavior change and accountability. After-care transition is available for up to three months.

Youth accepted into this program must meet BRS requirements and will require BRS authorization prior to placement. Referrals must include Reformation Plan, OYA RNA, ERASOR, previous treatment history and recommendations, juvenile court orders, parole/probation requirements, and post-placement plan.

## Services

**BRS Proctor Care - Mentor:** This program provides a community-based treatment alternative to group care and institutionalization for youth ages 12-17. Youth Programs focuses on youth who have a history of chronic law violations, multiple adjustment and behavioral and emotional problems including family problems, poor peer relations, school failure, minimal school performance, low self-esteem and mental health problems.

Services include close supervision of program youth, including monitoring of school performance and peer relationships, implementation of an individualized behavior management plan in the treatment foster care home, skills training, counseling, frequent contact with the proctor parents, intensive transition services with aftercare resources, out-patient drug and alcohol treatment and mental health services as needed.

Proctor parents are supervised and supported to provide youth with a supportive reinforcing placement where youth are encouraged to develop recreational and work skills and positive interpersonal habits.

Youth accepted into this program must meet BRS requirements and will require BRS authorization prior to placement. Referrals should include current Reformation Plan, OYA Risk Needs Assessment and Graph, previous treatment history and recommendation as well as, if available, social and family history, and recent psychological evaluation, risk needs assessment and case plan referral.

Services

Overview: Located in NW Portland, WS is an all-female (ages 12-20) serving residential BRS program with three levels of care. WSC has a culturally diverse staff who engage a positive relationship and positive youth development model, with emphasis on healthy girls and young women. Therapeutic interventions and skill-based services are highly individualized; Collaborative Problem Solving (CPS) is utilized as its behavior intervention and approach to skill building, as well as several Evidence Based curricula for group skills training. Trauma informed services engage best practices in working with girls, especially those with adverse childhood experiences such as abuse, neglect, abandonment, domestic violence, etc. Portland Public Schools DART (Day and Residential Treatment) holds classes on the WS campus throughout the academic year and partners with WS for extended classes between academic years, coupled with summer activities. Lifeworks NW has an office at WS that enhances coordinated access to mental health and addictions treatment. An Early Learning Center provides day care for infants and toddlers of young moms placed at WS. Volunteer mentors can be enrolled for youth with limited familial or social connections.

General Admissions Criteria and Referrals: Referral must include a copy of the youth’s Reformation Plan or case plan, OYA RNA, previous treatment history, social and family history, psychological evaluation if available, court information, and conditions of parole/probation. Youth accepted into these programs must meet BRS requirements, and consent to services. BRS authorization prior to placement is required. Exclusions: youth with sex offense history, active psychosis or psychiatric instability, active suicidal, homicidal, self-injurious or serious aggressive behaviors (unless willing and able to engage in safety planning), youth who are detoxifying from drugs or alcohol, youth eligible for Developmental Disability Services.

See Phase 2 ILP Hourly Services at the end of this directory.

Intensive Residential – Wildflowers Program: Wildflowers program provides residential services to female’s ages 12-20. Average length of stay is 6-12 months. A staff secure program with support and skill-building opportunities available to address anger management, grief and loss, depression, lagging social/life skills, healthy relationship skills, communication, and more. Outpatient D & A and relapse prevention, mental health therapy, and psychiatric services are accessible. Educational services include special education, high school completion or GED study, followed by community college, vocational training, or job experience for those who qualify.

Services

Basic Residential – Parenting Program: Parenting program provides services to female’s ages 12-20, who are pregnant or parenting a child 0-3. Young moms and their child can live together on the WS campus in a two generational approach. Average length of stay is one year. As with the Wildflowers program, support and skill-building opportunities are available to address anger management, grief and loss, depression, lagging social/life skills, healthy relationship skills, communication, and more. Outpatient D & A and relapse prevention, mental health therapy, and psychiatric services are accessible. Educational services include special education, high school completion or GED study, followed by community college, vocational training, or job experience for those who qualify. This program supports pregnant youth via pre-natal care, preparation for labor and delivery and infant care. Young moms partake in parenting classes using evidence-based curricula, and skills training in areas of child abuse prevention, creating a safe and healthy living environment for their children and themselves. An Early Learning Center on campus provides day care for their children.

Specific Admissions Criteria for Parenting Program Referrals: The program suggests that referrals be made as early in the pregnancy as possible. Babies born to mothers who are in the program during the prenatal period are usually healthier at birth. The program also recommends that a new mom remains in the program until her infant is at least three months old. The support needed during this time is essential, particularly regarding bonding and attachment and monitoring for postpartum depression. The program also works with young moms who are on reunification plans if their child has been removed from their care. In order to meet individualized BRS expectations, young moms must be willing to utilize the Early Learning Center services.

Services

Independent Living Program (ILP) | Cottage: The Cottage/ILP Program offers independent living services to female’s ages 17.5-20 with or without a child. On the WS campus there are four studio-like apartments and a duplex (Cottage) that are designated for girls/young women who are ready to practice acquired skills in a more self-directed manner, and learn new skills with the support, supervision and guidance of staff members. The dorm associated with the parenting program also houses and supports girls/young women who are working toward an independent living track yet may not be quite ready for the level of freedom and responsibility associated with the ILP apartments or Cottage. The apartments and Cottage have kitchenettes and kitchens for learning meal preparation and cooking. The Cottage/ILP is designed to engage young women in developing skills and planning for transition to adulthood and its associated responsibilities with emphasis on the behaviors that interfere with or form barriers to success. Areas of focus include continued education, vocational training, budgeting, household management, connection to resources and preparation for positive engagement in the community. Progression through ILP/ILS is determined by demonstrated attainment of stated goals and proficiency in areas identified as lagging behavioral skills. Active aftercare support is comprised of monitoring, crisis intervention, resource coordination and continued skills training in the community.

Specific Admissions Criteria for Referrals: ILP/Cottage will accept direct referrals or will create step-down plans with JJPOs for girls/young women already placed in BRS levels 4 and 5 who are eligible for transitioning to independent living. The Casey Life Skills Assessment and CPS Assessment and Planning Tool will assist with creating individualized plans and help determine where on campus is best suited at the onset of placement.

# Services

**BRS Intensive Residential:** Founded in 1889, St. Mary’s accepts emotionally and behaviorally disturbed adolescent boys between the ages of 10 and 17 in a residential setting. Treatment includes individual, group, and family counseling along with multiple skill training, education, and transition experiences within a structured milieu. Services are available for fire setters, those who require stabilization, assessment, and evaluation, as well as adjudicated and non-adjudicated sex offenders.

Services

Turning Point Youth Residential Program serves both male and female youth between the ages of 13 to 17 years of age. This residential treatment program brings treatment resources to youth in a residential setting, preparing youth for a successful transition into: a lesser restrictive community-based treatment program, foster or proctor care placement, home with intensive community-based services, or independent living situations. This program is designed around cognitive behavioral principles. These principles seek to increase awareness of the connection between thoughts, attitudes, and behavior; to identify risky or anti-social thoughts; to increase understanding that beliefs and attitudes can be changed; and, to develop or increase thoughts/skills leading to pro-social behavior.

Services

**Basic Residential**: This program serves youth ages 16 to 25, in a residential group home setting. Youth either attend school at the main office during the day, or are job searching, completing treatment, or in the community working. Services include individual and family counseling, case management services, education, vocation, and independent living skills and life skills classes. Youth are held accountable for their delinquent actions through restitution, community services, and/or sanctions. Aggressive acting-out youth, violent offenders, arsonists or youth requiring in-patient chemical dependency treatment are not appropriate referrals.

Youth accepted into this program must meet BRS requirements and will require BRS authorization prior to placement. Referrals should include OYA Case Plan, OYA RNA, previous treatment history and recommendation and, if available, social and family history, and recent psychological evaluation.

**Referral Process**: Youth accepted into these programs must meet BRS requirements and will require BRS authorization prior to placement. Referrals shall include OYA Case Plan, RNA, ERASOR, social/family history, psychological evaluation if available, birth certificate availability, social security information, education information, court orders, parole/probation requirements, and prior placement history.

Overview and Concepts

*Transitioning to Independence* Programs are intended to provide youth the opportunity to further develop and demonstrate independent living skills learned while in OYA facilities, camps, residential and proctor programs. Phase 1 is completed while in the ILP placement. Phase 2 will occur when the youth moves into his/her own housing in the community. Throughout Phase 2, OYA will continue to pay an hourly rate to the program to provide on-going skills training, service coordination, monitoring and crisis intervention.

**Programs participating in Phase 2 ILP Hourly Services**

- **Haag Home for Boys (Junction City)**
- **Janus Youth Programs- Buckman and Rivera (Portland):**
- **J Bar J Youth Services, The Loft (Bend) and The Apartment:**
- **Salvation Army White Shield (Portland):**
- **Youth Progress Association (Portland):**

**Criteria for Moving to Phase 2 ILP Hourly Services**

Completion of the residential portion of Enhanced ILP/ILP with a need for on-going additional support from the program. Youth will be living in their own housing in the community.

**Phase 2 ILP Hourly Services Process**

Services for Phase 2 are authorized using the *Phase 2 Service Authorization Voucher (YA 3305)*. Contractor/Program completes this form with the estimated number of hours for a three-month period. This is sent to the JPPO along with the Transitional Service Plan for approval. Once approved the JPPO returns the form and enters these services into JJIS. At the end of each month, the program must submit a *Phase 2 Activity Log (YA 3306)* to the JPPO for review and approval in JJIS. Progress and goal achievement should be reviewed monthly.

There are 4 service types during Phase 2. These are Crisis Intervention, Monitoring, Service Coordination and Skill Training. Youth in early stage stages of Phase 2 may require more hours of service. After 2-3 months the average hours/week should be approximately 1-2. OYA Community Resources Manager MUST approve any authorization for more than 6 hours per week. The anticipated duration will vary based on youth need level with a general guideline of 6 months. Below are examples of provided services:

- Continued monitoring to include visits to job site and living environment
- Continued skills training based on service needs
- 24-hour staff crisis intervention/support
- Coordination of monthly reviews with youth offender and support team to determine progress and goals for following month
- Weekly support or “problem-solving” group
- Assistance in accessing treatment services through community providers or youth offender’s own resources
- Regular visits to the housing site by support staff
- Daily telephone contact
- Availability to assist with difficulties or situations with youth offender’s employer
- Regular contact with landlords or resident managers by support staff
Community Step Down

**General Description of Program:**
Contractor shall provide continuing residential services to youth who have been in BRS Enhanced, BRS Basic or BRS Beginning Transition services but who are ready to practice acquired pro-social skills in community settings with less structure.

**Program Category:**
Behavior Rehabilitation Services – Community Step-Down

**Population to be served:**
The Contractor shall offer services to male youth offenders who have the following characteristics: are between the ages of 12 and 25 with a preferred age range of 12-18;
These youth may not be eligible for independent living services; and youth who are ready for graduated practice in the community and continue to need program support.

Minimum Direct Care Staffing Levels (based upon a 14-bed facility):
None - Proctor Program

**Minimum Weekly BRS Service Level Requirements:**
The Contractor shall offer 7 hours of counseling and skill building per week for each youth offender, based on the Service Plan, to include at a minimum:
1 hour of either individual counseling or skill building;
6 hours of individual or group counseling, skill building or consultation; and

**Special Program Definitions:**
For purposes of this Program only, the following paragraph is added to Section 1.2.10, entitled “Behavior Rehabilitation Services – Definitions”:

Social Environment Support: Support, face to face or by phone, provided to the youth offender and his/her social network (e.g., family, antisocial and pro-social peers in the community, neighborhood hangouts, school and/or job). This can involve assisting youth offenders in developing trusting relationships with responsible people in the community who are able to exert a positive influence.

Services

Sponsors provides case managed transitional and long-term housing for men and women (18 and over) with criminal histories and a range of programs and services designed to reduce future criminal behavior. Programs include mentoring, cognitive behavioral therapy (MRT), employment services, educational programming, a Veteran’s Grant and Per Diem program and contracted substance abuse treatment (on-site) and permanent housing for men, women, and people convicted of sex offenses.
