

Oregon Department of Aviation

Pre-construction Process

Tenant Name: _____

Location: _____

- Step 1** LESSEE will complete and submit application for an available Hangar Site.
- Step 2** Oregon Department of Aviation (ODA) will verify receipt of application with a letter to LESSEE. Site location will be determined and approved by ODA Airport Divisions.
This letter will be enclosed with the following forms and documentation:
- a) Pre-construction Process Form
 - b) Proposed hangar site drawings labeled Exhibit A & B
 - c) FAA 7460-1 form
 - d) Draft copy of Lease (for review)
- Step 3** LESSEE will complete FAA form 7460-1 and, together with a signed copy of this construction process document, return to ODA. ODA Planning will forward the 7460-1 form with a letter to FAA requesting approval of proposed construction (Approval may take a minimum of 6 to 8 weeks).
- Step 4** Once the "no objection" approval letter from FAA is received, ODA will review and approve the FAA requirements for heights.
- Step 5** LESSEE will commission a licensed surveyor to stake the proposed construction site. LESSEE will then schedule a meeting with ODA at the hangar site to verify the site has been correctly staked.
- Step 6** LESSEE will submit copies of building permits and a copy of county/city approved plans for review. NOTE: Fire suppression review will transpire during building permit process. Plan must address storm water run-off. LESSEE will request a Locate of Underground Utilities (if applicable) from the appropriate utility company.
- Step 7** When all the above criteria have been satisfactorily met, ODA will send LESSEE an executable lease agreement containing final Exhibits A & B. These are to be signed and returned to ODA in duplicate.
- Step 8** LESSEE must provide proof of Liability Insurance naming ODA as additionally insured. Non-commercial Policy coverage \$1M, Commercial Policy coverage \$1.5M and Fixed Base Operator coverage \$2M.
- Step 9** ODA will return one fully executed copy of lease to LESSEE along with a letter entitled "Notice to Proceed," indicating that the pre-construction process is complete and construction may begin.
- Step 10** Notify ODA when construction is complete and LESSEE is issued occupancy permit by local governing body and for final inspection by ODA.
