Public Comment Changes

What are the changes?

- Public written comments may be submitted beginning the day after a Board meeting
- The submission deadline will be 1.5 weeks before the next scheduled Board meeting
- Written comments received after the deadline will be sent to the board in the following public comment cycle, after the next scheduled Board meeting
- There will not be any changes to in-person or virtual verbal comments during meetings at this time

Why?

- To provide adequate time for staff and Board members to review and consider written comments ahead of the next Board meeting
- To allow the public more time to submit public comments for the next board meeting
- To maintain continued public access to submit comments, even after the deadline

When?

- Implementation will occur after adoption of the Master Plan
- Ongoing reminders will be provided to ensure the public is aware of the updated timeline
