Re: Joseph State Airport

After attending the meeting of October 7, 2026 with Tony Beach and the tenants and users of Joseph State Airport I am impressed with how their community is coming together to voice their concerns for the future of the airport.

The main subject is the discontinuation of fuel sales at JSY, temporary or not. Very seldom do we see that once a part of an airports services is taken away that it is replaced. I am asking that ODAV permits private operation to sell fuel from the existing tank (which did pass inspection) or ODAV restart sales with the existing tank allowing volunteers to perform inspections and filter changes.

Another subject is the volunteer process and waiver forms. These need to be published in an accessible manner and then responded to by ODAV when received. JSY needs in writing that they can move forward with using the International to plow the runway this winter. Furthermore, ODAV would benefit from posting seasonal positions stating the scope of work and seasonal dates and accepting applications.

I am fully aware of the financial short fall that the agency is facing so I ask that ODAV considers carefully its decisions in the cuts they are making at the state-owned airports and their operations. Whether commercial or GA, we are all a part of the aviation system in Oregon.

Thank you for your time!
