PERMIT REQUIREMENTS

No person may install, alter, or repair a boiler, pressure vessel, or pressure piping without **first** obtaining a permit from the Building Codes Division (BCD) and receiving permission from the assigned inspector.

In case of an emergency, a permit is not required in advance of installing, altering, or repairing a boiler, pressure vessel, or pressure piping, as long as a *Request for Boiler/Pressure Vessel Permit for Installation, Alteration, or Repair* is submitted to BCD within five days after starting the emergency work. The boiler permit technician must be immediately notified at 503-373-7538 when there is the need for emergency work. An emergency is defined as “an unplanned circumstance requiring immediate repair, installation, replacement, or shutdown because of risk to health, life, or property.”

The acceptance of a permit application by BCD does not signify that the installation, repair, or alteration is approved. The assigned inspector will approve the installation, alteration, or repair once it has been found to be satisfactory.

Installations, alterations, or repairs must be completed according to the current Oregon Boiler Specialty Code.

No person may engage in the business of installing, altering, or repairing boilers or pressure vessels without a valid boiler business license issued by BCD (ORS 480.630).

No person may, as the employee of a boiler business, install, alter, or repair a boiler, pressure vessel, or pressure piping without obtaining a boiler trade license from BCD (ORS 480.630).

Any boiler, pressure vessel, or pressure piping that is installed, repaired, or altered without a license is considered an unauthorized installation, repair, or alteration — unsafe to operate until all code requirements have been met.

Violations of licensing requirements can result in the assessment of civil penalties of up to \$5,000 for each violation (ORS 480.670 and ORS 455.895).

Questions: Contact the boiler program at 503-373-7538 or email bcd.boiler@dcbs.oregon.gov.
