Hospital staff are asked to enter bed capacity information, by type, as well as the number of patients with suspected or confirmed COVID-19 illness who are currently hospitalized at the time of data entry. These data may conflict with hospitalization status in Orpheus due to case reporting and investigation lags and temporary discrepancies in case classification.

Notice of Changes

The Daily Update format is being updated. Beginning May 27th, the total number of new cases, both presumptive and confirmed, will be posted at the top of the chart. On the left-hand side, the total number of people with positive test results will be provided.

This does not change the overall counting of cases but simplifies the process and allows for the changing nature of presumptive cases.

Beginning May 26th, the Race, Ethnicity, Select Symptoms and Risk Factors for Confirmed and Presumptive COVID-19 Cases chart will change from a weekly Tuesday reporting schedule to a Wednesday reporting schedule.
