

# **The DAS Datamart contains data from these statewide systems:**

## **1. SFMA (Statewide Financial Management Application)**

- a. SFMA is the statewide accounting application that processes your agency accounting transactions. This can be referred to as R\*STARS – the Relational Statewide Accounting and Reporting System.
- b. SFMA data is updated weekly with an extract of info Friday evening and an upload on Saturday evening. The data load is verified early Monday morning.
- c. Mid-July through August (considered Month 13 or Period 13) the YE Active Accounting Event, YE GL Detail, YE GL Summary, and Profile tables are updated three times per week for SFMA. Outside of Month 13, the YE tables are empty.

## **2. Workday (Payroll application)**

- a. This is the State of Oregon's current payroll, time tracking and HR information system. Workday replaced OSPA in December 2022.
- b. Workday data is loaded to the Datamart twice per month (run1 and run2).
- c. The payroll data is available the morning after the leave accrual process has been completed.
- d. The Workday data in the Datamart does not contain: Confidential Information, such as Social Security numbers, wage withholding/garnishment info, bank account information or certain insurance surcharges.

## **3. OSPA (Oregon Statewide Payroll Application)**

- a. OSPA data is contained in the Datamart with information through November 2022, and since that date, no new data has been added.
- b. In December 2022, Workday payroll data started loading to the Datamart.

## **4. ORBITS (Oregon Relational Budget Information Tracking System)**

- a. Orbits or Budget data is loaded weekly along with the normal SFMA load process.
- b. This info is mainly found in the 'Budget Actuals' table of the Datamart.

\*\*The above dates are subject to change and a calendar of exact dates can be found on the Datamart website (<http://www.oregon.gov/das/Financial/AcctgSys/Pages/datamart.aspx>)
