DAFM351 GENERAL LEDGER CLOSE

Overview

The purpose of the DAFM351 General Ledger Close program is to close the nominal general ledger account balances to the appropriate equity accounts. This program runs each fiscal year on a date following Month 13 close. SFMS will be running DAFM351 for FY19 on Friday, **August 23, 2019**. The program generates transactions and creates an interface file for processing with the nightly batch cycle. These transactions will zero out the nominal general ledger account balances for the prior fiscal year.

DAFM351 selects records using the following criteria from the Year End Close indicator of the D31 Comptroller General Ledger Account Profile:

- If the account is a nominal account, identified with YEC indicator of "2", and the balance is less than or greater than \$0.00, the account balance is closed to the appropriate equity account.
- If the account is a memo or real account, identified with YEC indicators of "0" and "1" respectively, it is not selected.

Program Details

DAFM351 selects records where the transaction year equals the current fiscal year minus one, sorting and summarizing by the criteria below. Records that meet the same criteria for an agency summarize into one amount.

- Agency
- Fiscal year
- D23 fund
- D31 normal balance indicator (Each GL account has a normal debit or normal credit balance as defined on the D31. For example, revenues have a normal credit balance and expenditures have a normal debit balance.)
- Appropriation year
- Grant number/phase
- Project number/phase

The program determines the appropriate equity account for each nominal account balance based on:

- YEC indicator of "2" on the D31 Comptroller General Ledger Account Profile
- If a GASB 54 code exists on a D23 fund:
 - A lookup of the D23 GASB 54 code (A1, C1, R1-R5 & U1)
 - A lookup of the Fund Balance GL and closing debit/credit T-codes from the D54 System Parameters Profile where the Table ID is GB54

- If a GASB 54 code does not exist on a D23 fund:
 - A lookup of the D24 GAAP Fund and the D21 GAAP Fund Type (05, 06, 09, 10 & 15-19)
 - A lookup of the closing debit/credit T-codes and the Fund Balance GL from the D21 GAAP Fund Type

T-codes 334-340, 342, 345, 346, 349, 352 and 353 close all nominal account balances to the appropriate equity account. All generated transactions will post with a batch agency of 999, a batch type of "Y", a document type of "YG", and a transaction effective date of 6/31/19. Any transactions that do not post because of errors will be on the 530 screen under agency 999.

GL 2960 Revenue Expenditure Summary is the offset to the equity GL account on all transactions. After all generated transactions have posted, the total of GL 2960 plus all the nominal GL balances will equal zero as of 6/31/19.

The balances in the memo accounts and real accounts will not change.

99 Default Oregon *	349	349	2951* *	System Clearing GL Level Only

* Nominal general ledger account activity is not valid for these fund types. Agencies should review these funds to ensure no nominal activity posted.

**GL 2951 prevents erroneous transactions from closing to an equity account. Agencies are required to make correcting entries to any fund that has a balance in GL 2951. Nominal general ledger account activity is not valid for GAAP fund types of 15 and 99. If DAFM351 finds any nominal activity in these fund types, it will close the erroneous transactions to GL 2951.

Agency Responsibilities

- On either **Friday, August 9, 2019** or **Friday, August 16, 2019**, order the DAFR8650 *Trial Balance by Fund/General Ledger* and DAFR8920 *General Ledger Fund Detail Trial Balance* reports for MO13, FY19. These are the “before” reports needed to verify equity balances after DAFM351 runs on the morning of **Friday, August 23, 2019**.
- On **Friday, August 23, 2019 before 4:30 p.m.**, set the Last Month Closed indicator to “12” for FY19 on the 25 Agency Control Profile. This will enable the transactions created by DAFM351 to post in the prior fiscal year with a 6/31 effective date.
- **August 26 – September 26, 2019:** DAFM351 produces DAFR3511 *General Ledger Close Control Report* that provides the summarized balances by GL account and fund for each agency. DAFR3511 is available only in an electronic format. Agencies login to SFMA Web Reports, <https://columbia.das.state.or.us:3025/CICS/PPDF/DAFWRPT>, and retrieve DAFR3511. Per OAR 166-300-0025(26), DAFR3511 should be retained for six years.
- **August 26 – August 30, 2019:** Agencies will work with their SFMS Agency Analyst to clear any DAFM351 error transactions on the 530 screen. Analysts will use the DAFR8461 *System Reconciliation Exceptions* and the DAFR2151 *Error Report* to assist with the necessary corrections. Agencies can request a copy of the DAFR2151 for batch Agency 999.
 - Agencies correct errors, if any, as soon as possible. User Class 48 provides access to Agency 999.
- If there are 530 screen errors, the 25 profile will need to have the Last Month Closed remain set to “12” to clear the transactions. SFMS will monitor the 25 profiles to prevent accidental posting of 6/31 effective date transactions to FY19.
 - Only agencies with DAFM351 transactions still on the 530 screen should have the Last Month Closed set to “12” for FY19.
 - Agencies may reset the 25 profile Last Month Closed indicator to “13” once notified by their SFMS Agency Analyst that all errors have cleared.
- After DAFM351 transactions have posted and all errors clear, agencies will request new DAFR8650 and DAFR8920 reports for MO13, FY19. This set of reports should be used with reports ordered on August 9 or 16 to compare equity account balances.
 - All nominal account balances will still remain on the reports.
 - GL 2960 Revenue Expenditure Summary balance will offset the nominal balances. The total of all the nominal balances plus the GL 2960 balance will net to zero.
 - The appropriate equity GL accounts will reflect an increase or decrease equal to the total amount of the nominal balances.
- Contact your SFMS Agency Analyst for assistance or to report any possible problems with DAFM351.
