

PICS Web Reporting

I. Purpose

The PICS Web reporting system is built to convert standard PICS reports into a PDF format and make them available for agencies to view, print and download from a website. The web site is developed in IBM's CICS Web Server (CWS) Transaction Server (TS) technology. The web documents are stored in a Mainframe PDSE format.

II. Web Site

The URL for the production web site is <https://columbia.das.state.or.us:3045/cics/pw55/ppdpw055>

This web site is CICS based, and are subsequently only available during the same operational hours as their equivalent CICS regions are (M-F 6am-6pm, Sat 8-3).

Access to the web site

After entering one of the URL's listed above, the operator will be prompted for a valid RACF id and password:

Once this screen appears, the operator can select any one of the links, and the PDF report will appear on their screen. With this display, the operator can save the PDF file to their PC/LAN, print specific pages, scroll through the report, or search for specific information. To access another report, mouse-click on the browsers back arrow, and the operator will be taken back to the original screen listing the available reports.

Website Errors and/or missing report please contact ORBITS.Help@oregon.gov.
