WHO WE ARE

DAS EIS CSS Information Security Awareness & Training (ISAT) applies to all Executive Branch agencies as defined in ORS 174.112. The overall strategy of the awareness program is one of positive engagement, providing training that people want to take to help them not only at work, but in their personal lives. The awareness program is led by our Information Security Awareness and Training Program Coordinator and guided by a dedicated advisory board with the support and backing of the CSS Governance, Risk and Compliance Director.

WHY SECURITY MATTERS

As employees of the State of Oregon we are tasked with protecting the data in our care. The security and integrity of our organization is of the utmost importance.

TO BE SUCCESSFUL, WE MUST FIRST ENGAGE THE PEOPLE; WE MUST PROVIDE THEM WITH RESOURCES THAT WILL ENABLE THEM TO CHANGE THEIR BEHAVIOR.

ISAT goes beyond just annual training and includes continual reinforcement throughout the year. As a result, employees, contractors, and volunteers will understand and follow organizational policies and actively recognize, prevent, and report incidents.

Our intent is to change how they act by exhibiting the same secure behaviors at home and at work.

Ultimately, security becomes part of people's culture.
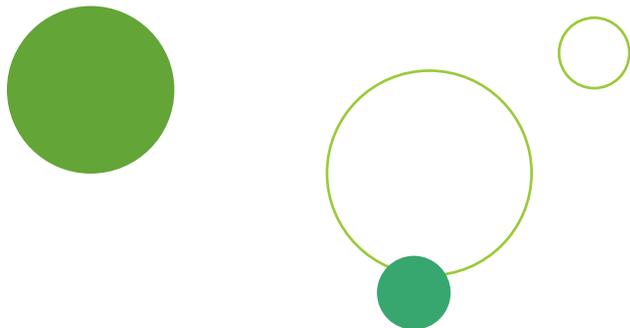

OVERVIEW OF PROGRAMS

Online Trainings

The DAS EIS Information Security Training: Foundations course is required of all executive branch staff including but not limited to board members, contractors, & volunteers.

Optional online courses are out of the box trainings that can be used as is or customized at additional cost. See list on page 5

Monthly Awareness Reinforcement

ISAT delivers security awareness reinforcement videos & posters to agency leadership every month. Staff will learn key cybersecurity best practices and how to make smarter security decisions. 2021 brings the video series 'The Inside Man' which reveals how easy it can be for an outsider to penetrate your organization's security controls and network.

Phishing Awareness Program

The Phishing Awareness Program is an enterprise service offered to state of Oregon government agencies for the purpose of reducing human risk.

PHISHING – GETTING STARTED

Why do you need the phishing program?

91% of cyber-attacks begin with a phishing email with 88% of organizations around the world experiencing spear phishing attempts in 2019 according to the Verizon DBIR.

Phishing training also referred to as phishing simulations and phishing awareness is a tool that will increase staff awareness around suspicious emails. It's designed to help individuals identify and change risky behavior.

EVEN ONE PERSON BEING COMPROMISED CAN PUT AN ENTIRE ORGANIZATION AT RISK!

Phishing program checklist:

EIS has made the Phishing Awareness Program a priority of the CSS Information Security Awareness & Training (ISAT) program. It is an enterprise service for all executive branch agencies.

The following is required for participation:

☐ Agency email must be migrated to one of the states M365 tenants

☐ Agency leadership will review all program documents at https://www.oregon.gov/das/OSCIO/Pages/Securityresources-ag.aspx

☐ Agency director or equivalent will communicate program expectations to all employees prior to implementation

☐ Agency is responsible for ensuring accurate data via proper allow-listing, participation in testing & data analysis

OUR MISSION

Deliver innovative solutions to manage human risk.

The CSS Information Security Awareness & Training (ISAT) program is a continuous effort to educate and empower the state's workforce to adopt good security habits at work, at home and while mobile.

The goal of the awareness program is to reduce human vulnerabilities that could result in a breach of confidentiality, integrity, and availability of state information assets, thereby increasing the overall security posture of the state.
