The IP55 desk phone has a lot of features. While we'll cover many of the more advanced topics individually, here are a few things that you can apply to everyday use.

We'll look at soft keys, how to navigate menus and basic volume control.

First, we'll navigate a menu. In this scenario, we'll use the Call Log.

Press the CALL LOG key to bring up the call log menu.

Pressing the CALL LOG key again, will switch between the top-level tabs.

Arrow over items using the UP and DOWN Arrows

Make a selection by pressing the OK key.
You can press the PHONE key at any time to return to the main screen.

Soft keys have different functions that stay relevant to the action(s) being performed. They can help you answer incoming calls, place outgoing calls and are used extensively in menu navigation.

Press the VOLUME UP or VOLUME DOWN keys to adjust the ringer volume.

To completely mute the ringer, press the RINGER OFF soft key.

This icon means that the ringer is muted.

The VOLUME UP and DOWN keys also control the call audio volume. When in a call, press the VOLUME UP key to increase audio volume and the VOLUME DOWN key to decrease it.
