

# What good is a secure environment *if it doesn't allow for growth?*

Redhawk is at your side—  
*protecting your business and your brand.*

Your brand is out there working hard every day. It is a living organism that grows with your business. Why should your security program be any different? Bring your security program to life with Redhawk security professionals at your side.

Founded in 2000 as a pure-play information security services company, Redhawk partners with your brand and your team for an adaptable and integrated approach to cybersecurity.

**866-605-6328**

Redhawk has the experience and adaptability to allow your business and your brand to thrive. **Be safer, sooner.** Call Redhawk today to secure the confidentiality, integrity and availability of your digital information.

## A security program that grows with you. A security partner for the life of your brand.

### IT Security Services

#### Strategy and Delivery

Ensuring a holistic security approach to your IT environment is essential for staying ahead of threats and risks. Let Redhawk help design or assess your security program, make the right technology investments, and support the integrity of your IT ecosystem. Our security consultants bring a diverse array of networking, systems, and risk management experience.

### Managed Security Services

#### 24/7 Vigilance

Redhawk's managed and monitored security services are designed to fit the requirements of your business. We specialize in providing robust support that focuses on resource effectiveness and minimizing damage to your IT environment. Our industry leading vulnerability scanning technologies will give you the assurances that your networks and applications are secure.

### Risk Management

#### Clarity for Compliance

Redhawk partners with customers needing compliance and regulatory requirements to bring clarity and true insight into their risk programs. From organizations that store, process, or transmit credit card data, to healthcare providers needing the latest HIPAA regulations, Redhawk helps take the mystery and confusion out of compliance mandates.

### Redhawk Technology

#### Visibility and Transparency

The Redhawk Cybersecurity Portal provides a secure central location for collaboration on security assessments, projects, troubleshooting and vendor management. Customers also gain visibility into their networks with the Redhawk SecureSensor™, which facilitates remote services to include maintenance, configuration, and incident response.

### REGIONAL RESOURCE LOCATIONS

West Coast - Bend, Ore.

Midwest – Austin

East Coast - Atlanta

Redhawk's engineers are backed by the CISSP program certifying mastery of best practices.

As a Qualified Security Assessor (QSA) company, Redhawk is certified by the PCI Security Standards Council (PCI SSC), the highest PCI certification possible.
