BEST VALUE ANALYSIS INSTRUCTIONS:

Please view the attachment titled, “Best Value Analysis and Contractor Selection Process”. This attachment can be found in the ORPIN attachments, and in each Price Agreement, Exhibit F.

“Best Value Analysis” means an evaluation process that involves consideration and evaluation of various factors to determine the fairest and most reasonable pricing offered for the Models to be purchased, which pricing results in the best value for the Authorized Purchaser. “Best Value” is determined by reviewing and analyzing various factors related to the Authorized Purchaser and the pricing for the desired Models to reach a conclusion that the pricing is fair and reasonable. Models that are a Best Value are not necessarily the lowest priced Models.

PRICING, SPECIAL ORDERING INSTRUCTIONS:

Please work with the Contractors to determine pricing, and any other ordering instructions.

CONSIDERATIONS OF PRICE AGREEMENTS:

State Agencies: Purchases over \$150,000 must be administered in the same manner as your agency's process. Purchase orders must be reviewed by DOJ, and a Contract Verification Form (House Bill 2375) must be completed and all associated documents kept with the purchase documents.

- **NOTE:** According to *HB 2017*, on January 1, 2018 vehicle dealers in Oregon are responsible for paying a "Vehicle Privilege Tax" of 0.5% on any new taxable vehicles sold in Oregon. This tax will show up as a separate line item on vehicles quoted against your purchase order(s). For questions concerning this tax, please refer to the [Oregon Department of Revenue](#).
