### PT60, PT62, and PT69

Finally... a chair that will fit small to medium stature users, but will also look good and adjust with ease! The PT collection delivers all the outstanding affordability, flexibility and ergonomic benefits that you could want in an office chair.

In addition to that, however, the PT60, PT62, and PT69 are designed with smaller stature users specifically in mind. The PT60 and PT62 models feature a smaller seat that makes sitting a more rewarding experience for users. But at the same time, both models also incorporate the multi-function benefits of the PT74 control mechanism.

# MAXWELL SERIES

The entire Maxwell series is constructed from heavy-duty components and wider-body-supporting 24" seat cushions. A remarkable chair that bears users up to a 500 lb. weight capacity, Maxwell is built to endure! And now, with the new slim-look design, users can achieve a less intimidating look without sacrificing any support or comfort.
