Vehicle Use/Access
Toolkit Documents

Purpose/Caveats: Agencies are required to manage their drivers consistent with the provisions of [OAR 125-155-0000](#). DAS-EGS/Risk Management (RM) developed the documents in this Toolkit to be resources for agencies as they develop policies, procedures, or plans to meet requirements of those rules. These documents are not the only way to satisfy rule requirements. Agencies may adopt—or adapt—any one (or all) of them to meet agency needs, provided the process the agency adopts fulfills the requirements of the rules at a minimum. Agencies may set greater restrictions than are in rule. Agencies with questions about a document or the sufficiency of their process should contact DAS-EGS/RM at 503-373-7475 or riskmanagement@oregon.gov.
