Central Services Division

Central Services Division (CSD) ensures sound fiscal management and building operations, in addition to information technology and research services.

Our goals
- Provide leadership in financial management
- Timely, accurate, consistent, and relevant information and service
- Understand division and program goals and desired outcomes
- Promote collaborative and innovative solutions
- Foster an environment of continuous process improvement

What we do
We deliver excellent customer service with every interaction, balancing the needs of the Department of Consumer and Business Services (DCBS) with our responsibility to ensure compliance with statutes, rules, and policies. We understand and accept the challenge to be flexible in our service delivery while standardizing functions for maximum efficiency.

Accounting services
- Analyze, process, and reports financial transactions in accordance with generally accepted accounting principles and federal regulations. This includes the cashiering of revenues, payment of liabilities and the recording and reconciliation of transactions.

Assessments
- Manages the reporting, collection, and audit functions related to the Workers’ Benefit Fund assessment along with the Oregon Health Insurance Marketplace program. Collects and audits the Workers’ Compensation Premium Assessments.

Budget services
- Agency's liaison to the DAS Chief Financial Office and the Legislative Fiscal Office.
- Develops, executes, and manages the biennial budget and prepares fiscal impact statements and analysis.
- Provides direction, guidance, information and budget documents to budget and fiscal analysts to ensure budget data accurately represents revenue and expenditures.
- Ensures accurate position adjustments and budget data are entered correctly into statewide tracking systems.

Information Technology & Research
- Provides a broad range of specialized technical services in the areas of information systems, data analysis/dissemination, and computer/telecommunication services.
- Supports a number of critical systems to meet the regulatory requirements for each program and other state and federal agencies.
- DCBS has a complex computer environment which includes Oracle, SQL Server, .NET, ColdFusion and other technologies.
