I. MLAC Statement of Purpose and Values

MLAC supports a workers' compensation system that:

- Provides adequate and cost-effective financial and medical benefits
- Achieves maximum possible value for labor and management by balancing benefits, quality, and costs
- Protects the financial integrity of Oregon's employees and their families
- Supports exclusive remedy
- Emphasizes prevention
- Encourages administrative efficiency, timeliness, and non-adversarial problem solving
- Is a product of agreement between management and labor

MLAC provides an effective forum for business and labor to meet to explore, discuss, and resolve issues involving the workers' compensation system.

When making recommendations, MLAC members apply a common set of values:

Balance and Fairness	A system designed to deal even-handedly with all parties, is administered fairly and meets the needs of both workers and employers.
Adequacy	A system in which benefits are commensurate with the severity of the injury or illness and sufficient to protect the financial integrity of the worker's family.
Affordability	A system which provides quality care in a cost-effective manner and contributes to a healthy business climate.
Efficiency	A system which is user friendly, streamlined, and maintains high standards.
Stability and Flexibility	A system stable enough to encourage consistency and efficiency, yet flexible enough to change when necessary.
Predictability	A system in which benefits, costs, and consequences are known and can be planned for.
