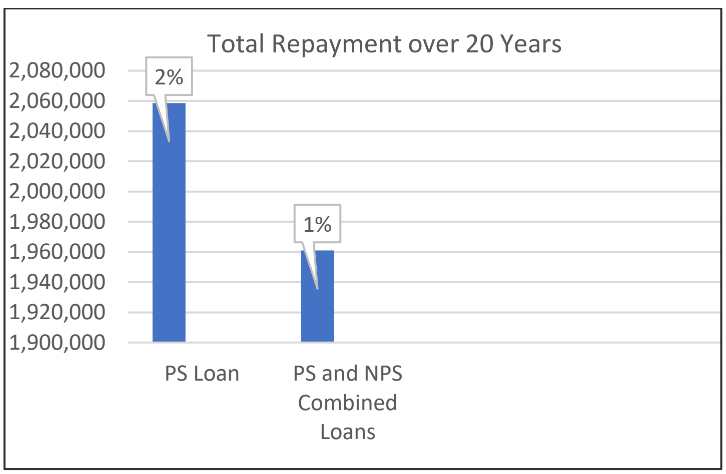
The Sponsorship Option: making your loan dollars go further

All Clean Water State Revolving Fund loans offer below-market interest rates and other favorable terms. But for communities pursuing traditional wastewater projects, the benefits are even greater when combined with a nonpoint source control or estuary management project through the Sponsorship Option.

This "sponsorship option" encourages communities to pursue water restoration or protection projects by discounting the combined loan's interest rate to as low as 1 percent. A loan applicant must be a public agency proposing a "treatment works" project and the additional nonpoint source project.

EXAMPLE	Loan Amount	Interest Rate	Repayment over 20 years
Point Source Project Loan	$1,000,000	2%	$2,058,601
Combined Point and Nonpoint Source Projects Loan	$1,393,442	1%	$1,961,054



To apply, complete Nonpoint Source and Point Source loan applications.
