

IMPORTANT!

As of July 1, 2009 Oregon law prohibits gasoline facilities from “topping off” or overfilling your gas tank.

Don't Top Off!

“Topping off” is overfilling the tank and in most cases going beyond the “click.”

By not overfilling your tank you will...

Protect Your Health and the Environment

Overfilling your gas tank can increase the amount of toxic and carcinogenic pollutants in the air we breathe.

Save Money

The fuel pumped during topping off may not be going into your tank. Overfilling can clog your fuel system, or worse... spill on the ground!
