Clean Fuels Program Backstop Aggregator 2018

Part I: General Information

The role of the Clean Fuels Program (CFP) Backstop Aggregator is to capture the value of residential electric vehicle charging when electric utilities do not opt into the CFP and to use proceeds from the monetization of clean fuels credits attributable to such charging to promote and support transportation electrification across Oregon. In the case where credits are not claimed by an electric utility, the Backstop Aggregator will serve as the agent. DEQ will calculate the number of credits that will be granted to the Backstop Aggregator and require that the proceeds received by the Backstop Aggregator are used to promote and support transportation electrification across the state. The Environmental Quality Commission approved the selection of the Contractor, Forth Mobility Fund, as the Backstop Aggregator through a competitive public process where qualified entities submitted applications and were scored and recommended by DEQ. The purpose of this Contract is to establish the parameters for how the revenue from the Contractor's sale of clean fuel credits must be applied.

Part II: Key Persons

Each of the following employees of Contractor is a Key Person under this Contract:

- a. Jeff Allen, Executive Director
- b. Zach Henkin, Deputy Director
- c. Jeanette Shaw, Director, Government Relations
- d. Catherine Teebay, Project Manager
- e. Esther Pullido, Project Manager
- f. Ashley Duplanty, Marketing Manager
- g. Sergio Lopez, Project Associate
- h. Gina Avalos, Office Associate

Part III: Work

The Contractor shall perform the services described below in the role as the Backstop Aggregator as described in this Contract and in compliance with Oregon Administrative Rules (OAR) Chapter 340 Division 253. Contractor must obtain DEQ approval of its workplans prior to undertaking specific requirements related to each task, as described in Part IV below. Upon DEQ's approval of each workplan, the Contractor must implement the workplan in accordance with the approved schedule and budget.

Task 1 – Monetization of Credits

The Contractor shall monetize the credits granted to them by DEQ in accordance with the following principles:

- Credit monetization shall focus on establishing revenue stream stability rather than absolute credit value maximization.

- Credit monetization shall be accomplished equitably and fairly, without any favoritism or bias between potential credit purchasers, and at credit values that are reflective of the general credit trading market. Monetization contrary to these principles shall be considered unreasonable.
- Subject to Contract Section 7, Contractor may subcontract with consultants or third parties to assist with the administration of selling CFP credits.
- All revenue that Contractor receives from monetization of credits shall be accounted for and maintained in a fund separate from any other revenue source. Any interest or other earnings on such revenues shall remain in such separate fund and are to be treated as revenue from the monetization of credits under this Contract.
- Contractor shall use appropriate financial and accounting controls, including application of Generally Accepted Accounting Principles, to document and ensure that all revenue from the monetization of credits is spent consistent with, and only as provided in, this Contract.

Task 2 – Statewide Consumer Engagement

The Contractor shall implement outreach and awareness campaigns statewide to educate the public about electric vehicles, including the basic information about electric vehicles such as the various models that are available and their costs and benefits.

For this task, the Contractor shall:

- Conduct marketing awareness campaigns using traditional and social media.
- Organize and coordinate electric vehicle ride and drive events.
- Provide on-line materials that shall be made available on <https://forthmobility.org> and <https://goelectricoregon.gov>.
- Perform outreach to employers to encourage investment in workplace charging for their employees.

Task 3 – Utility Engagement

The Contractor shall engage with the utilities that have not opted into the CFP, and for which the Contractor serves as the Backstop Aggregator, to educate such utilities about electric vehicles and why the utilities play a critical role in expanding the adoption of electric vehicles.

For this task, the Contractor shall:

- Contact each utility for which they serve as the Backstop Aggregator to better understand the utility's needs and goals regarding electric vehicles and encourage greater participation in promoting electric vehicles.
- Provide each utility, upon its request, with a transportation electrification strategy, a model website, or other educational materials.
- Convene and host a workgroup where utilities can: discuss the benefits and challenges of increasing electric vehicle adoption and share ideas about potential incentives they can provide to their customers.

Task 4 – Focused Local Programs

The Contractor shall create focused local programs in areas where a higher number of electric vehicles are registered. Specifically, where the sale of credits results in at least \$20,000 in annual revenue from a single

utility service territory, the Contractor shall dedicate at least 50% of the total annual revenue from the sale of credits from that service territory on this task. The Contractor may also choose to develop focused programs in other regions, particularly where it is serving as Backstop Aggregator for several nearby utilities or there are strong regional electric vehicle markets.

For this task, the Contractor shall consult with the local utilities and other local stakeholders to develop the focused local programs. The Contractor may also work with a local partner or partners to deliver services more effectively and efficiently. The focused local programs will likely evolve over time to reflect lessons learned and new best practices and research findings, and may include:

- Engagement with fleet managers to promote conversion of their fleets to electric vehicles.
- Organizing “group buy” programs, rebates or other incentives towards the purchase or lease of electric vehicles or charging equipment. Contractor must ensure that any such programs are administered equitably and fairly, without any favoritism or bias between potential beneficiaries of such programs.
- Development of demonstration/pilot projects to promote electric mobility options, particularly for traditionally underserved communities.
- Additional activities as approved by DEQ in the workplans.

Task 5 – Program Administration

The Contractor shall ensure its work is conducted efficiently and in an accountable, transparent manner. The Contractor may spend a maximum of 10% of the total annual revenue from the sale of credits for this task.

For this task, the Contractor shall:

- Manage and monetize credits as described in Task 1 to complete the work as described in this Contract. Subject to Contract Section 7, Contractor may subcontract with consultants or third parties to assist with the administration of selling CFP credits. Those subcontracting costs will be considered program administration costs.
- Produce the workplans as described in Part IV.A.
- Produce the annual report as described in Part IV.B.
- Maintain records and produce the annual audit as described in Part IV.C.

Part IV: Deliverables

A. Workplans

1. Initial workplan

- a. By no later than 15 days after the execution of this Contract, the Contractor shall submit an initial workplan to the Agency that describes the number and types of tasks (as described in Part III above) to be conducted through December 31, 2018. The workplan must include a detailed budget and timeline.

with the Contractor to modify the workplan to address the Agency's concerns and develop a workplan that the Agency may approve. The Agency will make its best effort to approve the workplan, in writing, within 15 days of its receipt of the workplan.

- c. Within 5 days of the Agency's approval of the workplan, the Agency will place a number of credits into the CFP Online System account of the Contractor. The number of credits will be equal to the number of credits generated by all electric vehicles registered in the State of Oregon less the credits that have already been claimed by utilities that have opted in to participate in the CFP by October 1, 2017.
- d. If Contractor wishes to make any changes to the workplan after it has been approved by DEQ, such changes must be approved by DEQ in writing. If DEQ wishes to make any changes to the workplan after it has approved the workplan, Contractor must accept such changes in writing.

If on December 31st Contractor still holds either (i) clean fuels credits in its CFP account, or (ii) revenue that it has received from the monetization of credits, then such credits and revenue will be rolled over into the next calendar year and the Contractor's workplan for that year must include such credits and revenue in addition to the anticipated revenue from the new batch of credits it will be due to receive.
- b. The Agency will review the submitted workplan in good faith to determine whether it is consistent with this Contract, reasonable, and will achieve the goals of the Agency and the Clean Fuels Program. If the Agency concludes that changes in the workplan are necessary, the Agency will work with the Contractor to modify the workplan to address the Agency's concerns and develop an annual workplan that the Agency may approve.
