

Legend

- Impaired River/Stream (Hg)
- Impaired Lake (Hg)
- Willamette - Sub-basins (HUC8)
- Willamette Basin (HUC4)

This map shows the Willamette Basin with waterbodies highlighted to identify locations currently requiring a TMDL to address mercury impairment. These waterbodies include the main stem of the Willamette, seven of its tributaries, four stream segments that do not flow directly into the Willamette and two reservoirs. A map inset shows the location of the Willamette Basin within Oregon.
