**Overview:**

- **Grading, Street, and Utility Position and Alignment ConstructionNote:**
  - Details on the grading, street, and utility position and alignment construction, including notes oniodeontiments and adjustments.

- **Legend:**
  - A legend explaining the various symbols and abbreviations used in the diagram.

- **Area of No Proposed Disturbance:**
  - Indication of areas where no proposed disturbance is expected.

- **Existing and Proposed Contours:**
  - Contours shown on the图纸 to indicate existing and proposed areas.

- **Notes:**
  - Notes about the project, including:
    - Post-development stormwater run-off of the proposed development area is collected via catch basins and roof drains.
    - Discharge of construction dewatering for utility trenches and foundation work in this area. Contractor to provide pump and hose system for dewatering.
    - During construction contractor shall monitor dewatering and adjust filter basin size based on dewatering needs. Dewatering basin may be adjusted to a maximum size of 30' x 30'.
    - Once the detention basin and outlet structure are installed, along with permanent stabilization, then dewatering may be routed to this basin.

- **Graphic Scale:**
  - A graphic scale is provided for reference.

- **Project Information Needed:**
  - Details on the project information needed, including:
    - See construction documents for pond grading details and planting plans.
    - Area of no proposed disturbance.
    - Discharge of construction dewatering for utility trenches and foundation work in this area. Contractor to provide pump and hose system for dewatering.
    - During construction contractor shall monitor dewatering and adjust filter basin size based on dewatering needs. Dewatering basin may be adjusted to a maximum size of 30' x 30'.
    - Once the detention basin and outlet structure are installed, along with permanent stabilization, then dewatering may be routed to this basin.
